Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services Unit,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: (613-951-3350) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

National Enquiries Line	1-800-263-1136
National Telecommunications Device for the Hearing Impaired	1-800-363-7629
National Toll-free Order-only Line (Canada and United States)	1-800-267-6677

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6.

(1-613-951-7277)

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolinguistique et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Sous-section du service à la clientèle,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: (613-951-3350) ou au centre de consultation de Statistique Canada à:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, **aux utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada.

Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48 - 1984.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

HIGHLIGHTS

Industrial product price index

Industrial prices edged up 0.4% in September as the economy strengthened in some sectors. The major factor in the increase was newsprint prices. Other increases included lumber, gasoline and fuel oil. These were partly offset by price declines for non-ferrous primary metal products and certain chemicals. Approximately 20% of the overall price increase in September was accounted for by a rise in the value of the United States dollar.

The 12-month change in industrial prices ceased its five month decline in September. It recovered to 7.6% from 7% in August. Most of this increase, however, is explainable by movements in exchange rates that occurred in August and September of 1994 and 1995.

The most significant source of upward pressure on industrial prices in September came from newsprint (+7.4%), softwood lumber (+2.9%) and gasoline and fuel oil (+2.8%). As newsprint producers continue to operate at full capacity, the strong demand for newsprint is fueling price increases and some sellers are finding it necessary to ration sales to some purchasers. If these conditions continue, further price increases for newsprint seem likely.

Much of the rise in softwood lumber prices was due to increases in the price of spruce, pine and fir. These price increases were encouraged by the rise in United States residential construction that began in May. Recent figures from the U.S. Commerce Department indicate that U.S. housing starts actually declined in both August and September. Lumber inventories are low in the United States and demand may increase if sellers begin restocking.

Both gasoline and fuel oil prices, declining during the June-August period, showed increases in September. Crude oil prices, which had begun declining in May, have turned around in August.

Prices for the major non-ferrous metal products produced in Canada declined in September. Copper and copper alloy product prices were down 3.7%. Nickel product prices dropped 4.9%. Aluminum product prices fell 1.2%. Other price declines included zinc and aluminum scrap. Although prices have been variable in recent months, exports of various base metals to the European Union have been rising.

FAITS SAILLANTS

Indice des prix des produits industriels

Les prix industriels ont gagné 0,4% en septembre, à la faveur d'une reprise de l'économie dans certains secteurs. Le principal facteur de l'augmentation est le prix du papier journal. Les autres augmentations de prix ont touché le bois de construction, l'essence et le mazout. Elles ont été partiellement compensées par le recul du prix des produits métalliques primaires non ferreux et de certains produits chimiques. Environ 20% de l'augmentation d'ensemble en septembre vient d'une hausse de la valeur du dollar des États-Unis.

La variation sur 12 mois des prix industriels a terminé son repli de cinq mois en septembre. Elle se situait à 7,6% en septembre, comparé à 7% en août. Le gros de cette progression, toutefois, s'explique par les mouvements de taux de change survenus à la fois en août et septembre de 1994 et 1995.

L'effet d'entraînement le plus marqué sur les prix industriels en septembre est venu du papier journal (+7,4%), du bois de résineux (+2,9%) et de l'essence et du mazout (+2,8%). Comme les producteurs de papier journal continuent de fonctionner à pleine capacité, la vigueur de la demande de papier journal provoque des augmentations de prix et certains vendeurs trouvent nécessaire de rationner les ventes à certains acheteurs. Si ces conditions se maintiennent, le prix du papier journal subira vraisemblablement d'autres augmentations.

Une bonne part de la montée du prix du bois de résineux est liée à des augmentations du prix de l'épinette, du pin et du sapin. Ces augmentations de prix ont été favorisées par l'augmentation, amorcée en mai, de la construction résidentielle aux États-Unis. Les derniers chiffres du Département du Commerce des États-Unis révèlent que le nombre réel de mises en chantier aux États-Unis a effectivement diminué en août et en septembre. Les stocks de bois de construction sont faibles aux États-Unis, et la demande pourrait augmenter si les vendeurs commencent à les reconstituer.

Les prix de l'essence et du mazout ont chuté pendant la période de juin à août mais ont progressé en septembre. Le prix du pétrole brut, qui a commencé à baisser en mai, a connu un revirement en août.

Le prix des principaux produits de métaux non ferreux manufacturés au Canada est tombé en septembre. Le prix des produits du cuivre et d'alliages de cuivre a baissé de 3,7%. Le prix des produits du nickel a chuté de 4,9%. Le prix des produits de l'aluminium s'est replié de 1,2%. Les autres baisses de prix ont touché le zinc et les déchets d'aluminium. Bien que les prix aient été variables ces derniers mois, les exportations de divers métaux communs vers l'Union européenne ont progressé.

Chemical prices fell by 1.1% overall. Competitive pressures were said to be the reason behind most of the declines in chemical prices. The decline in plastic shipments since April has put downward pressure on the prices of some chemicals used as inputs.

The Canadian dollar depreciated against the U.S. dollar by 0.4% between August 15 and September 15. This meant manufacturers selling goods priced in U.S. dollars received more Canadian dollars for their products. The most significant consequences were felt by manufacturers of motor vehicles, lumber, pulp, paper, and non-ferrous primary metal products. If the effect of the Canadian dollar's fall was excluded, the monthly change in industrial prices would have been a little over +0.3%.

In September, both consumers and manufacturers saw increases in the 12-month change of goods prices. The Consumer Price Index released October 20 indicated that the 12-month change in goods prices paid by consumers rose from 1.6% in August to 1.9% in September. For manufacturers, the 12-month change in the prices received for Canadian consumer goods rose from a little under 2.5% to a little under 3%. About half of what the consumer pays goes to manufacturers, the remainder is divided between retailers, wholesalers, indirect taxes, and transporters.

Although exports rose noticeably in August in most sectors, it was really only manufacturers of forestry products who saw price increases in September. On the domestic side, construction has begun to show some signs of improvement. There have also been increases in automobile shipments as new models rolled off production lines. Internationally, recent figures suggest industrial production has been increasing in the United States and Japan. If these trends continue, Canadian industrial prices may increase more than they did in September.

NOTE TO USERS

The Industrial Product Price Index (IPPI) reflects prices producers receive as goods leave their plants. It does not reflect what consumers pay. Unlike the Consumer Price Index (CPI), the IPPI excludes indirect taxes and the costs (transportation, wholesale, and retail costs) that occur from the time a good leaves a plant until the final user takes possession.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. A rise or fall in the value of the Canadian dollar against the U.S. dollar therefore affects the IPPI. A 1.0% change in the value of the Canadian dollar against the U.S. dollar has been estimated to change the IPPI by about 0.2%.

Le prix des produits chimiques a fléchi de 1,1% au total. On attribue aux pressions de la concurrence la plupart des reculs du prix des produits chimiques. La diminution des livraisons de matières plastiques depuis avril a eu un effet de ralentissement sur le prix de certains produits chimiques servant d'entrées.

Le dollar canadien a déprécié 0,4% sur le dollar américain entre le 15 août et le 15 septembre. Ainsi, les fabricants vendant des biens dont le prix s'exprime en dollars US ont reçu plus de dollars canadiens pour leurs produits. Les conséquences les plus importantes ont été ressenties par les fabricants de véhicules automobiles, de bois de construction, de pâte, de papier et de produits métalliques primaires non ferreux. Correction faite de l'effet de la chute du dollar canadien, la variation mensuelle des prix industriels aurait été légèrement supérieure à +0,3%.

En septembre, les consommateurs et les fabricants ont vu augmenter la variation sur 12 mois du prix des biens. L'indice des prix à la consommation publié le 20 octobre indiquait que la variation sur 12 mois du prix qu'ont versé les consommateurs pour les biens est passée de 1,6% en août à 1,9% en septembre. Pour les fabricants, la variation sur 12 mois du prix reçu pour les biens de consommation canadiens est passée d'un peu moins de 2,5% à un peu moins de 3%. La moitié environ de ce que le consommateur paie va aux fabricants, et le reste est partagé entre les détaillants, les grossistes, les taxes indirectes et les transporteurs.

Malgré une avance marquée des exportations en août dans la plupart des secteurs, les fabricants de produits forestiers sont en réalité les seuls à avoir observé des augmentations de prix en septembre. Au Canada, la construction commence à présenter certains signes d'amélioration. Il y a également eu des augmentations des livraisons d'automobiles avec la sortie des nouveaux modèles de la chaîne de production. À l'étranger, selon des chiffres récents, la production industrielle est en hausse aux États-Unis et au Japon. Si ces tendances se maintiennent, les prix industriels au Canada pourraient augmenter encore plus qu'en septembre.

NOTES AUX UTILISATEURS

L'indice des prix des produits industriels (IPPI) retrace les prix que les producteurs reçoivent au moment où les produits franchissent les portes de l'usine. Il ne retrace pas ce que le consommateur paie. Contrairement à l'indice des prix à la consommation (IPC), l'IPPI exclut les impôts indirects et tous les coûts (coûts du transport et du commerce de gros et de détail) qui surviennent lorsque le produit part de l'usine jusqu'au moment où l'utilisateur final en prend possession.

Les producteurs canadiens exportent beaucoup de biens. Ils vont souvent indiquer leurs prix en devises étrangères, en particulier dans le cas des véhicules automobiles, des pâtes de bois, du papier et des produits du bois. Les fluctuations de la valeur du dollar canadien par rapport à la devise américaine se répercuteront par conséquent sur l'IPPI. Une variation de 1,0% de la valeur du dollar canadien par rapport au dollar américain devrait, selon les estimations, se traduire par une variation d'environ 0,2% de l'IPPI.

HIGHLIGHTS

Raw materials price index

Manufacturers paid 1.5% less for raw materials in September, as lower prices for wood and non-ferrous metals were partly offset by higher crude oil prices.

The declines in wood prices (-7%) and non-ferrous metal prices (-3%) were somewhat offset by a 1.1% increase in crude oil prices.

In addition, with reserves at their lowest level in 20 years, wheat prices rose almost 8% in September.

On an annual basis, raw material prices were 5.7% higher in September than they were a year earlier. The increase halted a long decline in the annual rate that started in January when the change was +18.4%. It had gone down to +4.3% in August.

Excluding mineral fuels, raw material prices declined 2.5% in September, and the 12-month change fell to 5.6% from 7.6% in August.

Wood prices have declined almost 13% over the last three months. Prices are now almost comparable to what they were a year ago. Currently, there is a glut of pulp logs on the market. Pulp prices in turn have shown only marginal increases in August and September. Newsprint prices, however, continue to increase, moving up more than 7% in September. The newsprint industry is working at full capacity. Wood prices will probably remain stable or weaken further in the near future until the excess supply of pulp logs comes to market or there is a resurgence in the demand for lumber.

August crude oil prices were subject to upward pressure due to renewed tensions in the Middle East. In September, crude oil prices rose (+1.1%) as Hurricanes Luis and Marilyn caused havoc at refineries in the Caribbean, particularly at Hess, the world's largest refinery. However, large world production of crude oil, along with the sale of 38 million barrels from the U.S. Strategic Petroleum Reserve (over 5 years) and the eventual return of Iraq to the market may depress prices in the long run.

FAITS SAILLANTS

Indice des prix des matières brutes

En septembre, les matières brutes ont coûté 1,5% de moins aux fabricants, la baisse des prix du bois et des métaux non ferreux ayant été contrebalancée en partie par la hausse du prix du pétrole brut.

La diminution des prix du bois (-7%) et des métaux non ferreux (-3%) a été quelque peu contrebalancée par l'augmentation de 1,1% du prix du pétrole brut.

En outre, le prix du blé a augmenté de près de 8% en septembre, les stocks étant descendus à leur niveau le plus bas en 20 ans.

Par ailleurs, en septembre, le prix des matières brutes était 5,7% supérieur au niveau enregistré un an auparavant. Cette hausse a mis fin à la diminution prolongée de la variation annuelle qui avait débuté en janvier, mois où le prix des matières brutes était 18,4% plus élevé que l'année précédente à la même période. Le taux de variation annuelle était descendu à +4,3% en août.

Si l'on ne tient pas compte des combustibles minéraux, le prix des matières brutes aurait diminué de 2,5% en septembre, et la variation sur 12 mois aurait été de 5,6%, comparativement à 7,6% en août.

Le prix du bois a diminué de près de 13% au cours des trois derniers mois. Il se situe presque, maintenant, au niveau qu'il atteignait il y a un an. Il existe actuellement un surplus de billes à pâte sur le marché. Le prix de la pâte ne s'est accru que faiblement en août et en septembre. Toutefois, le prix du papier journal a continué d'augmenter, de plus de 7% en septembre. L'industrie du papier journal fonctionne à pleine capacité. Le prix du bois va sans doute demeurer stable ou continuer à diminuer dans les prochains mois, jusqu'à ce que les surplus de billes à pâte arrivent sur le marché ou que la demande de bois d'oeuvre reprenne.

En août, le prix du pétrole brut avait subi des pressions à la hausse en raison de la reprise des tensions au Moyen-Orient. En septembre, il a augmenté de 1,1%, les ouragans Luis et Marilyn ayant causé des dégâts aux raffineries situées dans les Caraïbes, particulièrement à la raffinerie Hess, la plus grande au monde. Toutefois, il se peut que le prix diminue à long terme, en raison de l'importante production de pétrole brut à l'échelle mondiale, de la vente de 38 millions de barils provenant des réserves stratégiques d'hydrocarbures des États-Unis (au cours d'une période de cinq ans) et du retour éventuel de l'Iraq sur le marché.

Even though natural gas prices have declined almost 12% over the last 12 months, Canada has been able to increase its share of the U.S. market to almost 14%.

Vegetable product prices increased almost 1% in September as higher prices for grains and rubber were partly offset by lower prices for coffee, sugar and oilseeds.

Wheat prices moved up almost 8% in September because of reserves at their lowest levels in 20 years and strong export demand. Compared to 12 months ago, wheat prices were up 34%. China is expected to buy almost 5 million tonnes of wheat from Canada in 1995-96. The Russian crop just harvested has been reported to be its lowest in almost 30 years. All signs appear positive as to stable or increased wheat prices in the near future.

In September, animal and animal product prices declined by less than 1%. Prices over the last 12 months were up almost 7%, mainly due to higher prices for hogs (+29%), unprocessed milk (+9) and fish (+13%). Lower cattle prices (-8%) dampened the overall increase. Even with ample supply of available hogs, prices remain strong. According to market analysts, demand has been firm due to the major fast food chain restaurants featuring bacon on their menus.

Non-ferrous metal prices fell 3% in September. Lower prices for copper concentrates (-4%), aluminium materials (-5%) and nickel concentrates (-6%) were the major contributors. Copper prices were subject to higher inventories. However, copper prices should strengthen in the next few months if the North American motor vehicle and residential construction industries rebound. As investment fund buying helped to push up base metal prices over the last 14 months, recent selling off has somewhat dampened prices.

Bien que le prix du gaz naturel ait baissé de près de 12% au cours des 12 derniers mois, le Canada a été en mesure de faire augmenter sa part du marché américain, laquelle est passée à près de 14%.

Le prix des substances végétales s'est accru de près de 1% en septembre, la hausse des prix des céréales et du caoutchouc ayant été contrebalancée en partie par la baisse des prix du café, du sucre et des oléagineux.

Le prix du blé s'est accru de près de 8% en septembre, car les stocks étaient à leur niveau le plus bas en 20 ans et la demande a été forte dans les pays étrangers. Il se trouvait à un niveau supérieur de 34% à celui atteint un an auparavant. On s'attend à ce que la Chine achète près de 5 millions de tonnes de blé du Canada en 1995-1996. En Russie, la dernière récolte a été, paraît-il, la plus faible des quelque 30 dernières années. Tout indique que le prix du blé devrait demeurer stable ou augmenter au cours des prochains mois.

En septembre, le prix des animaux et des substances animales a connu une diminution de moins de 1%. Au cours des 12 derniers mois, il a augmenté de près de 7%, surtout en raison de la hausse des prix des porcs (+29%), du lait non transformé (+9%) et du poisson (+13%). La baisse du prix des bovins (-8%) a toutefois freiné la hausse globale. Le prix demeure élevé malgré l'abondance de porcs. Selon les spécialistes de l'analyse de marché, la demande est ferme en raison du fait que le bacon est en vedette dans les principales chaînes de restaurants-minutes.

Le prix des métaux non ferreux a diminué de 3% en septembre, en raison principalement de la baisse des prix des concentrés de cuivre (-4%), des matières d'aluminium (-5%) et des concentrés de nickel (-6%). Le prix du cuivre a diminué à cause de l'augmentation des stocks. Il devrait cependant s'accroître, au cours des prochains mois, si les activités reprennent dans les industries nord-américaines de l'automobile et de la construction résidentielle. Les achats des fonds de placement ont contribué à faire augmenter le prix des métaux communs au cours des 14 derniers mois, mais les ventes récentes ont quelque peu fait freiner les prix.

NOTE TO USERS

The Raw Materials Price Index (RMPI) reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Also, unlike the Industrial Product Price Index, the RMPI includes goods that are not produced in Canada.

NOTE AUX UTILISATEURS

L'indice des prix des matières brutes est représentatif du prix que les fabricants canadiens paient pour les principales matières brutes. Un grand nombre de ces prix sont fixés sur les marchés mondiaux. De plus, contrairement à l'indice des prix des produits industriels, l'IPMB inclut des biens qui ne sont pas produits au Canada.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.

(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - Toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.

pppp indicates the PCG code (except for some special aggregations which include several PCGs).

rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E+S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

ss indique le code du niveau S des produits (de 9 à 28)

mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)

nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.

pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E+S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ désigne le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

\sum_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

✓ **Define New
Markets**

✓ **Pinpoint Profit
Opportunities**

✓ **Dégagez les
nouvelles tendances**

✓ **Définissez les
nouveaux marchés**

✓ **Déterminez les
possibilités de profit**

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the **Market Research Handbook** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- ▶ how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
 - ▶ the level of sales in retail chain and department stores;
 - ▶ what goods are being traded between Canada, U.S., and other countries;
 - ▶ census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration
- ...and much, much more!

With over 600 pages, the **Handbook** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the **Market Research Handbook** (Catalogue #63-2240XPB) today for only \$110 in Canada plus \$7.70 GST, US\$132 in the United States, and US\$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR FAX (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le **Recueil statistique des études de marché** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- ▶ les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
 - ▶ le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
 - ▶ les biens échangés entre le Canada, les É.-U. et d'autres pays;
 - ▶ les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale
- ...et bien plus encore!

Le **Recueil**, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du **Recueil statistique des études de marché** (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 \$ au Canada plus 7,70 \$ de TPS, 132 \$ US aux États-Unis et 154 \$ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Canada

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture -- only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistic Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers -- financial analysts, planners, economists and business leaders -- have contributed to CEO's present, widely-acclaimed, two-part format. The Analysis Section includes thought-provoking commentary on current economic conditions, issues, trends and developments. The Statistical Summary contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts -- names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual *Historical Statistical Supplement* -- at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue no. 10-2300XPB) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries. Highlights of the *Canadian Composite Leading Indicator* (catalogue no. 11F0008XFE) are available by fax -- the same day of release -- for \$70 annually in Canada and US\$70 in the United States.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La section de l'analyse contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'aperçu statistique contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du *Supplément statistique historique annuel* à titre gracieux.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-2300XPB au catalogue) est de 220 \$ au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays. Les faits saillants de l'*Indicateur composite avancé* (n° 11F0008XFF au catalogue) sont offerts par télécopieur -- le jour même de leur parution -- pour 70 \$ par année au Canada et 70 \$ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

Hire our team of researchers for \$56 a year

Notre équipe de chercheurs est à votre service pour 56 \$ par année

Subscribing to *Perspectives on Labour and Income* is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But *Perspectives* is more than just facts and figures.

It offers authoritative insights into complex labour and income issues, analyzing the statistics to bring you simple, clear summaries of labour market and income trends.

Our team of experts brings you the latest labour and income data. Each quarterly issue provides:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research
- information on new surveys

As a special bonus, twice a year you will also receive *The Labour Market Review*, giving you timely analysis on labour market performance over the previous six months or year.

And all for only \$56!

Thousands of Canadian professionals turn to *Perspectives* to discover emerging trends in labour and income and to stay up to date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find *Perspectives* indispensable. GUARANTEED. If you aren't convinced after reading the first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to *Perspectives* today (Cat. No. 75-0010XPE).

ORDER NOW!

For only \$56 (plus \$3.92 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US\$68 for U.S. customers and US\$80 for customers in other countries. Fax your VISA or MasterCard order to: (613) 951-1584. Call toll free: 1-800-267-6677. Or mail to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication.

S'abonner à *L'emploi et le revenu en perspective*, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les

tendances actuelles du marché du travail et des revenus.

Notre équipe de spécialistes met à votre disposition des données récentes sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez :

- des articles de fond sur l'emploi et le revenu
- plus de 50 indicateurs clés de l'emploi et du revenu
- un aperçu de la recherche en cours
- de l'information sur les nouvelles enquêtes

En prime, vous recevrez le *Bilan du marché du travail* deux fois l'an. Vous disposerez ainsi d'une analyse à jour de la situation du marché du travail pour les six derniers mois ou la dernière année.

Tout cela pour 56 \$ seulement!

Des milliers de professionnels au Canada consultent *Perspective* pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que *L'emploi et le revenu en perspective* deviendra pour vous un outil indispensable. C'EST GARANTI. Si vous n'êtes pas satisfait après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à *Perspective* (n° 75-0010XPF au cat.) dès aujourd'hui.

ABONNEZ-VOUS DÈS MAINTENANT!

Pour 56 \$ seulement (TPS de 3,92 \$ en sus), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année). L'abonnement est de 68 \$ US aux États-Unis et de 80 \$ US dans les autres pays. Faites parvenir votre commande par télécopieur (VISA ou MasterCard) au (613) 951-1584, par téléphone (sans frais) au 1-800-267-6677, par courrier à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6. Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

HIGHLIGHTS

Industrial Product Price Index

Industrial prices were 6.3% higher in October than a year earlier. But, after September's divergence from the trend, the 12-month change in industrial prices resumed its downward movement. Prices were 0.5% lower than in September. Exchange rate movements were central to both the 12-month and the monthly changes.

The 12-month change in industrial prices has been trending downward since January, when it peaked at +10.3%. Exchange rate movements in 1994 and 1995 were responsible for most of the spike in September. Declines in the 12-month price changes of primary non-ferrous metal products, pulp and paper, and chemicals also contributed to October's drop.

Between mid-September and mid-October, the value of the Canadian dollar rose 2.2%. This rise meant that manufacturers selling goods priced in U.S. dollars received fewer Canadian dollars for their products. Exporters of motor vehicles, lumber, pulp, paper, and non-ferrous metal products were most affected. If the effect of the Canadian dollar's rise was excluded, the monthly change in industrial prices would have been about -0.1% instead of -0.5%.

The most significant sources of downward pressure on industrial prices in October came from non-ferrous metal products (-5.4%), softwood lumber (-4.7%), and gasoline and fuel oil (-2.9%). The decline in non-ferrous metal products included aluminum products (-5.9%), copper and copper alloy products (-3.2%) and nickel products (-5.3%). Important contributors to these declines were speculative sales of aluminum and copper by commodity and investment funds. The Canadian dollar's rise also contributed to the decline in prices for aluminum and nickel products. Despite these declines, overall prices for primary metal products in Canada were 5% higher in October 1995 than a year earlier. In the United States, where the mix of metals is somewhat different, overall primary metal product prices were 6.4% higher.

Price declines were general for softwood lumber. In the United States, housing starts declined in both August and September. In Canada, the value of building permits in September dropped 21.4% for non-residential construction and 6.8% for residential construction. In addition, Canada Mortgage and Housing Corporation reported new home starts, down 10.9% from September, were at their second lowest level since the 1982 recession. The higher Canadian dollar also contributed to the overall decline in softwood lumber prices. In October, while Canadian softwood prices were 11.7% lower than last year, U.S. prices were down 5.7%.

FAITS SAILLANTS

indice des prix des produits industriels

Par rapport au même mois l'année précédente, les prix industriels ont augmenté de 6,3% en octobre. Cependant, après s'être écartée de la tendance en septembre, la variation des prix industriels sur 12 mois a repris son mouvement à la baisse. Les prix se situent maintenant à 0,5% de moins qu'en septembre. Les mouvements du taux de change expliquent principalement la variation sur 12 mois et les variations mensuelles.

La variation des prix industriels sur 12 mois est en baisse depuis janvier, où elle avait atteint un sommet de +10,3%. Les mouvements du taux de change en 1994 et en 1995 expliquent la plus grande partie de l'augmentation de septembre. Les diminutions de la variation des prix sur 12 mois pour les produits métalliques primaires non ferreux, les pâtes et papiers et les produits chimiques ont aussi favorisé le repli enregistré en octobre.

Entre la mi-septembre et la mi-octobre, la valeur du dollar canadien a augmenté de 2,2%. Cela signifie que les fabricants qui vendent des produits dont le prix est exprimé en dollars US reçoivent un montant en dollars canadiens moins élevé. Cette situation touche principalement les exportateurs de véhicules automobiles, de bois, de pâte de bois, de papier et de produits métalliques primaires non ferreux. Si l'on exclut l'effet de la réévaluation du dollar canadien, la variation mensuelle des prix industriels aurait été d'environ -0,1% au lieu de -0,5%.

Les principales causes de la pression à la baisse sur les prix industriels en octobre sont les produits métalliques non ferreux (-5,4%), le bois de résineux (-4,7%) et l'essence et le mazout (-2,9%). La diminution du prix des produits métalliques non ferreux touche les produits de l'aluminium (-5,9%), le cuivre et les produits d'alliages de cuivre (-3,2%) et les produits du nickel (-5,3%). Les ventes spéculatives d'aluminium et de cuivre par les fonds communs de placement et de marchandises expliquent en grande partie ces diminutions. La hausse du dollar canadien a aussi fait diminuer le prix des produits de l'aluminium et du nickel. Malgré ces reculs, les prix des produits métalliques primaires au Canada sont, dans l'ensemble, supérieurs de 5% en octobre 1995 par rapport à ceux d'il y a un an. Aux États-Unis, où la composition des métaux est quelque peu différente, le prix global des produits métalliques primaires connaissait une hausse de 6,4%.

L'affaissement des prix s'est généralisé pour le bois de résineux. Aux États-Unis, les mises en chantier ont reculé en août et septembre. Au Canada, la valeur des permis de construire en septembre a baissé de 21,4% dans le cas de la construction non résidentielle et de 6,8% pour ce qui est de la construction résidentielle. En outre, la Société canadienne d'hypothèques et de logement indique que les nouvelles mises en chantier, qui accusent un recul de 10,9% depuis septembre, se situent à leur deuxième plus bas niveau depuis la récession de 1982. La valeur plus élevée du dollar canadien a aussi contribué à faire diminuer globalement le prix du bois de résineux. En octobre, le prix du bois de résineux au Canada était inférieur de 11,7% à celui d'il y a 12 mois, tandis qu'aux États-Unis, il enregistrait une baisse de 5,7%.

Gasoline and fuel oil fell 2.9% in October. This occurred as crude oil prices fell 5.1% and North American gasoline stocks rose.

In October, an initial estimate is made of the price changes for new motor vehicle models. Domestic prices for automobiles made in Canada showed a 3.6% increase, while export prices of automobiles showed only a 0.7% rise. Much of the difference was due to the increased value of the Canadian dollar.

In the pulp and paper industry, pulp prices rose 3.7% while newsprint declined 0.8%. However, excluding the rise in the Canadian dollar, pulp prices increased 5% while newsprint increased 0.3%.

Canadian industrial prices are being affected by weaknesses in the domestic economy, namely a low level of construction and relatively weak auto sales. However, conditions in the United States may provide some support. In the United States, industrial production during the August-to-October period was higher than earlier in the year, and the unemployment rate improved in October.

L'essence et le mazout ont régressé de 2,9% en octobre à la suite d'une diminution de 5,1% du prix du pétrole brut et d'une augmentation des stocks d'essence en Amérique du Nord.

Octobre est le mois où l'on procède à une première estimation de la variation du prix des nouveaux modèles de véhicules automobiles. Le prix intérieur des automobiles fabriquées au Canada est en hausse de 3,6%, tandis que le prix des automobiles exportées n'a progressé que de 0,7%. Cet écart s'explique en grande partie par l'appréciation du dollar canadien.

Dans l'industrie des pâtes et papiers, le prix de la pâte a monté de 3,7% alors que celui du papier journal reculait de 0,8%. Cependant, si l'on exclut la hausse du dollar canadien, le prix de la pâte a progressé de 5% et celui du papier journal, de 0,3%.

Les faiblesses de l'économie intérieure, notamment un niveau peu élevé de la construction et des ventes d'automobiles relativement faibles, influent sur les prix industriels au Canada. Toutefois, la situation aux États-Unis pourrait aider quelque peu. Aux États-Unis, la production industrielle a été plus élevée dans la période d'août-octobre que pendant les premiers mois de l'année, et le taux de chômage s'est replié en octobre.

NOTE TO USERS

The Industrial Product Price Index (IPPI) reflects prices producers receive as goods leave their plants. It does not reflect what consumers pay. Unlike the Consumer Price Index (CPI), the IPPI excludes indirect taxes and the costs (transportation, wholesale, and retail costs) that occur from the time a good leaves a plant until the final user takes possession.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. A rise or fall in the value of the Canadian dollar against the U.S. dollar therefore affects the IPPI. A 1% change in the value of the Canadian dollar against the U.S. dollar has been estimated to change the IPPI by about 0.2%.

NOTES AUX UTILISATEURS

L'indice des prix des produits industriels (IPPI) retrace les prix que les producteurs reçoivent au moment où les produits franchissent les portes de l'usine. Il ne retrace pas ce que le consommateur paie. Contrairement à l'indice des prix à la consommation (IPC), l'IPPI exclut les impôts indirects et tous les coûts (coûts du transport et du commerce de gros et de détail) qui surviennent lorsque le produit part de l'usine jusqu'au moment où l'utilisateur final en prend possession.

Les producteurs canadiens exportent beaucoup de biens. Ils vont souvent indiquer leurs prix en devises étrangères, en particulier dans le cas des véhicules automobiles, des pâtes de bois, du papier et des produits du bois. Les fluctuations de la valeur du dollar canadien par rapport à la devise américaine se répercuteront par conséquent sur l'IPPI. Une variation de 1% de la valeur du dollar canadien par rapport au dollar américain devrait, selon les estimations, se traduire par une variation d'environ 0,2% de l'IPPI.

HIGHLIGHTS

Raw Materials Price Index

In October, manufacturers paid significantly less for their raw materials. Overall prices dropped 2.7%, mainly due to crude oil, wood and metals. This marked the fourth successive month of declining raw material prices.

On an annual basis, raw material price changes have been declining since January 1995. In October, the 12-month change was only +1.8%, compared with +18.4% in January. If the present downward trend continues, November could bring a negative annual price change the first since late 1993.

Excluding mineral fuels, raw material prices declined 2% in October, and the 12-month change fell to +3.1% from +5.5% in September.

Crude oil prices fell 5.1% in October, down almost 15% since April and practically back to their October 1994 level. The fall in prices was due mainly to reduced demand from oil refineries and to increased supply from most of the producing areas, particularly the North Sea. As oil refineries enjoy increased sources of supply, inventories can be set at much lower levels. If all sources of supply follow through with increased production, and if Iraq returns to the world market, then further downward pressure will be put on oil prices.

Wood prices weakened by more than 15% between June and October. In October, the monthly and annual declines were both the same at 3%. The lumber industry faced lower construction activity in North America. Intense demand for pulpwood has recently slowed. As well, inventories for wood chips have reached comfortable levels, taking some pressure off pulpwood prices. Demand for newsprint remained strong, with potential price increases on the horizon. However, to economize operations, newspaper publishers have moved to narrower and lighter paper (for example, from 48.8 grams to 45 grams per square metre).

Overall metal prices declined 3% in October. Leading the way were copper (-3.1%), aluminum materials (-8.4%), and gold (-2.9%). Sales by commodity and investment funds have dampened metal prices recently. Copper prices have been affected by the weak housing and automotive industries. Aluminum materials appear to be subject to high inventories and weak order books, particularly in Japan. As well,

FAITS SAILLANTS

Indice des prix des matières brutes

En octobre, les matières brutes ont coûté beaucoup moins cher aux fabricants. Dans l'ensemble, les prix ont diminué de 2,7%, situation en grande partie attribuable au pétrole brut, au bois et aux métaux. Il s'agit de la quatrième baisse mensuelle successive du prix des matières brutes.

En chiffres annuels, le changements des prix des matières brutes diminue depuis janvier 1995. En octobre, la variation sur 12 mois n'était que de +1,8%, comparativement à +18,4% en janvier. Si la tendance actuelle à la baisse se poursuit, le mois de novembre pourrait bien afficher la première variation négative des prix annuels depuis la fin de 1993.

À l'exclusion des combustibles minéraux, le prix des matières brutes a fléchi de 2% en octobre, tandis que la variation sur 12 mois se situe maintenant à +3,1%, comparativement à +5,5% en septembre.

Le prix du pétrole brut s'est replié de 5,1% en octobre. En baisse de presque 15% depuis avril, le prix du pétrole brut se situe à peu près au même niveau qu'il y a 12 mois. Parmi les principaux facteurs qui semblent influencer sur le prix du pétrole brut, mentionnons la réduction de la demande des raffineries de pétrole et l'augmentation de l'offre de la plupart des régions productrices, surtout de la mer du Nord. Étant donné que les raffineries ont maintenant accès à des sources accrues d'approvisionnement, elles peuvent établir leurs stocks à des niveaux beaucoup plus bas. Si toutes les sources d'approvisionnement emboîtent le pas en augmentant leur production, et que l'Irak retourne sur le marché mondial, une pression supplémentaire à la baisse s'exercera sur le prix du pétrole brut.

Le prix du bois a diminué de plus de 15% au cours des quatre derniers mois, baissant de juin à octobre. En octobre, la baisse mensuelle et la baisse d'une année à l'autre s'établissaient toutes les deux à 3%. L'industrie du bois d'oeuvre fait face à un recul de la construction en Amérique du Nord. La demande vive pour le bois à pâte a récemment ralenti. Les stocks de copeaux de bois ont maintenant atteint des niveaux très confortables, diminuant du même coup la pression sur le prix du bois à pâte. La demande de papier journal demeure forte et des augmentations de prix s'annoncent à l'horizon. Cependant, pour faire des économies, les éditeurs de journaux songent maintenant à adopter un papier plus étroit et plus léger (soit, 45 gr/m² au lieu de 48,8 gr/m²).

Dans l'ensemble, le prix des métaux a chuté de 3% en octobre. Le cuivre (-3,1%), les matières d'aluminium (-8,4%) et l'or (-2,9%) ont ouvert la voie à cette diminution. Les récentes liquidations opérées par des fonds communs de placement et de marchandises ont quelque peu freiné le prix des métaux. Le ralentissement dans les secteurs du logement et de l'automobile a influé sur le prix du cuivre. Les matériaux d'aluminium semblent faire face à des stocks élevés et à un faible carnet

the aluminum market is probably anticipating a gradual reactivating of smelter capacity shut under the pact (Memorandum of Understanding) that was made by aluminum producing countries as they tried to regulate the world supply of aluminum.

Platinum prices fell almost 9% in October, leading gold and silver prices lower. The weakness in metal prices becomes even more pronounced with the declining prices for scrap metals-copper, aluminum, lead, and even iron and steel scrap. Most noticeably, copper and copper alloy scrap prices dropped in October (-8%). In the near future, metal prices may show only moderate strength as new supplies of metals come on the market.

In October, prices rose for grains (+4.5%) and oilseeds (+2.1%). Wheat (+6%) and soybeans (+5.5%) were the major contributors. As an indicator of higher wheat prices, the Canadian Wheat Board's asking price climbed to \$230 per tonne in October, from \$191 a year earlier. Higher grain prices mostly reflected very strong demand for wheat, because of worldwide shortages, and the export tax on grains imposed by the European Union, in order to conserve their own supplies. Offsetting the higher prices for grains and oilseeds in the vegetable product category were lower prices for potatoes (-27%), raw tobacco, coffee and sugar.

de commandes, surtout au Japon. De même, le marché de l'aluminium anticipe sans doute une reprise progressive de la capacité des fonderies qui avaient été fermées aux termes du pacte (protocole d'entente). Cette entente est composée de pays producteurs qui essayent de régler le stock mondial d'aluminium.

Le prix du platine a reculé de presque 9% en octobre, entraînant dans son sillage une baisse plus prononcée du prix de l'or et de l'argent. La faiblesse du prix des métaux est encore plus marquée à cause du recul du prix des déchets de cuivre, d'aluminium, de plomb et même de fer et d'acier. En octobre, c'est la chute du prix des déchets de cuivre et d'alliages de cuivre (-8%) qui ressort le plus. À court terme, le prix des métaux pourra se renforcer de façon modeste au moment des nouveaux arrivages de métaux sur le marché.

En octobre, le prix des céréales (+4,5%) et des oléagineux (+2,1%) a grimpé. Ceci est surtout à cause du blé (+6%) et des fèves de soya (+5,5%). À titre d'indication des prix de blé élevés, le cours vendeur de la Commission canadienne du blé a monté à 230 \$ la tonne en octobre, comparativement à 191 \$ il y a un an. La demande de blé est très forte dans le monde à cause des pénuries mondiales et de la taxe sur les exportations de céréales que l'Union européenne a approuvé afin de préserver ses propres approvisionnements. La diminution du prix des pommes de terre (-27%), du tabac brut, du café et du sucre a neutralisé la hausse du prix des céréales et des oléagineux dans la catégorie des matières végétales.

NOTE TO USERS

The Raw Materials Price Index (RMPI) reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Also, unlike the Industrial Product Price Index, the RMPI includes goods that are not produced in Canada.

NOTE AUX UTILISATEURS

L'indice des prix des matières brutes est représentatif du prix que les fabricants canadiens paient pour les principales matières brutes. Un grand nombre de ces prix sont fixés sur les marchés mondiaux. De plus, contrairement à l'indice des prix des produits industriels, l'IPMB inclut des biens qui ne sont pas produits au Canada.

Note: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.

(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - Toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

- (1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E+S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

- (1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E+S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing
TABLEAU 4. Indices des prix des produits industriels par étape de transformation

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

\sum_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios), and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprennent les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec l'Unité de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

✓ **Identify
Emerging Trends**

✓ **Define New
Markets**

✓ **Pinpoint Profit
Opportunities**

✓ **Dégagez les
nouvelles tendances**

✓ **Définissez les
nouveaux marchés**

✓ **Déterminez les
possibilités de profit**

To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an in-depth analysis of Canadian industries, the *Market Research Handbook* gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- ▶ how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
- ▶ the level of sales in retail chain and department stores;
- ▶ what goods are being traded between Canada, U.S., and other countries;
- ▶ census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration

...and much, much more!

With over 600 pages, the *Handbook* includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product**, **Labour Force Productivity**, **Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the *Market Research Handbook* (Catalogue #63-2240XPB) today for only \$110 in Canada plus \$7.70 GST, US\$132 in the United States, and US\$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR FAX (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication.

Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le *Recueil statistique des études de marché* brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- ▶ les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
- ▶ le niveau de ventes dans les magasins de détail à succursales et les grands magasins;
- ▶ les biens échangés entre le Canada, les É.-U. et d'autres pays;
- ▶ les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale

...et bien plus encore!

Le *Recueil*, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du *Recueil statistique des études de marché* (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 \$ au Canada plus 7,70 \$ de TPS, 132 \$ US aux États-Unis et 154 \$ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication.

*Don't let the changing world
take you by surprise!*

*Ne soyez pas dépassé
par les événements!*

An aging population. Lone-parent families. A diverse labour force. Do you know how today's social changes will affect your future ... your organization ... and your family?

Keep pace with the dramatic shifts in Canada's evolving social fabric with Statistic Canada's best-selling quarterly, *Canadian Social Trends*. With vast and varied reports on major changes in key social issues and trends, this periodical incorporates findings from over 50 national surveys.

Written by some of Canada's leading-edge social analysts, *Canadian Social Trends* combines painstaking research with dynamic prose on topics like **ethnic diversity, low-income families, time-crunch stress, violent crime** and much more — all in a colourful, easy-to-read, magazine format.

A lasting record of changing times!

Join the thousands of business and policy analysts, social-science professionals, and academics who trust *Canadian Social Trends* to demystify the causes and consequences of change in Canadian society. Don't miss a single issue — subscribe today.

Canadian Social Trends (catalogue number 11-0080XPE) is \$34 annually in Canada, US\$41 in the United States and US\$48 in other countries.

Le vieillissement de la population.

Les familles monoparentales. La diversification de la population active. Savez-vous comment les changements sociaux d'aujourd'hui vont se répercuter sur votre avenir, votre organisation, votre famille?

Suivez l'évolution spectaculaire de la société canadienne grâce à *Tendances sociales canadiennes*, une publication trimestrielle de Statistique Canada. Avec des articles vastes et variés sur les principaux changements caractérisant les questions et les tendances sociales principales, cette publication intègre les résultats de plus de 50 enquêtes nationales.

Certains des analystes sociaux les plus reconnus du Canada rédigent des articles dans *Tendances sociales canadiennes*. Ils présentent les résultats de recherches minutieuses dans un style attrayant pour des sujets tels que **la diversité ethnique, les familles à faible revenu, le stress dû au manque de temps, le crime** et bien d'autres encore dans une revue haute en couleur et de lecture aisée.

Un dossier permanent d'une époque en évolution!

Des milliers d'analystes des entreprises et des politiques, de professionnels des sciences sociales et d'universitaires lisent *Tendances sociales canadiennes* pour identifier les causes et les conséquences de l'évolution de la société canadienne. Ne manquez pas un numéro, abonnez-vous dès aujourd'hui.

L'abonnement annuel à *Tendances sociales canadiennes* (n° 11-0080XPF au catalogue) coûte 34 \$ au Canada, 41 \$ US aux États-Unis et 48 \$ US dans les autres pays.

To order, write to Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Pour passer votre commande, écrivez à Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au centre de services-conseils de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication.

Vous pouvez aussi envoyer votre commande par télécopieur, au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard.

For and About Businesses Serving the Business of Canada...

At last, current data and expert analysis on this VITAL sector in one publication!

The services sector now dominates the industrial economies of the world. Telecommunications, banking, advertising, computers, real estate, engineering and insurance represent an eclectic range of services on which all other economic sectors rely.

Despite their critical economic role, however, it has been hard to find out what's happening in these industries. Extensive and time-consuming efforts have, at best, provided a collection of diverse bits and pieces of information ... an incomplete basis for informed understanding and effective action.

Now, instead of this fragmented picture, **Services Indicators** brings you a cohesive whole. An innovative quarterly from Statistics Canada, this publication **breaks new ground**, providing **timely** updates on performance and developments in:

- Communications
- Finance, Insurance and Real Estate
- Business Services

Services Indicators brings together analytical tables, charts, graphs and commentary in a stimulating and inviting format. From a wide range of key financial indicators including profits, equity, revenues, assets and liabilities, to trends and analysis of employment, salaries and output – PLUS a probing feature article in every issue, **Services Indicators** gives you the complete picture for the first time!

Finally, anyone with a vested interest in the services economy can go to **Services Indicators** for **current** information on these industries ... both **at-a-glance** and **in more detail than has ever been available before** – all in one unique publication.

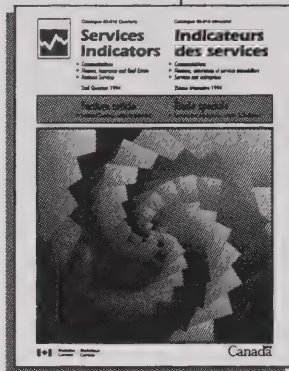

If **your** business is serving business in Canada, or if you are involved in financing, supplying, assessing or actually using these services, **Services Indicators** is a turning point – an opportunity to forge into the future armed with the most current insights and knowledge.

Order YOUR subscription to **Services Indicators** today!

Services Indicators (catalogue no. 63-0160XPB) is \$112 (plus 7% GST) in Canada, US\$135 in the United States and US\$157 in other countries.

To order, write to Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call 1-800-267-6677 toll-free in Canada and the United States [1-613-951-7277 elsewhere] and charge to your VISA or MasterCard.

Au sujet des entreprises au service des affaires du Canada et à leur intention...

Enfin regroupées en une publication, des données courantes et des analyses éclairées sur ce secteur **ESSENTIEL**!

Le secteur des services domine à l'heure actuelle les économies industrielles du monde. Les télécommunications, les opérations bancaires, la publicité, l'informatique, l'immobilier, le génie et l'assurance représentent une gamme éclectique de services sur lesquels reposent tous les autres secteurs économiques.

En dépit de leur rôle critique sur le plan économique, il est toutefois difficile de savoir ce qui se passe dans ces branches d'activité. Des efforts considérables et fastidieux ont permis, au mieux, de rassembler une collection de renseignements fragmentaires divers... qui ne favorisent pas la compréhension avisée et la prise de mesures efficaces.

Remplacez **maintenant** ce tableau fragmentaire par l'image cohérente que vous offre **Indicateurs des services**. Cette publication trimestrielle innovatrice de Statistique Canada **pénètre dans un domaine inexploré**, fournissant des aperçus **opportuns** du rendement et des progrès dans les domaines suivants :

- Communications
- Finance, assurance et immobilier
- Services aux entreprises

Indicateurs des services rassemble des tableaux analytiques, des diagrammes, des graphiques et des observations en un mode de présentation stimulant et attrayant. En puisant à même une vaste gamme d'indicateurs financiers importants, allant notamment des profits, des capitaux propres, des recettes, de l'actif et du passif aux tendances et analyses de l'emploi, des salaires et de l'extrant – à laquelle s'ajoute un article de fond exploratif dans chaque numéro, **Indicateurs des services** brosse pour la première fois un tableau complet!

Enfin, quiconque s'intéresse au secteur des services peut consulter **Indicateurs des services** pour trouver des renseignements **courants** sur ces branches d'activité... tant sous une **forme sommaire qu'à un niveau de détail n'ayant jamais encore été offert** – et ce, dans une même publication.

Si vous êtes de ceux qui fournissent des services aux entreprises canadiennes, ou si vous financez, fournissez ou évaluez ces services ou y avez en fait recours, **Indicateurs des services** représente un tournant – une chance de s'aventurer dans l'avenir en étant armé des réflexions et connaissances les plus actuelles.

Commandez dès aujourd'hui VOTRE abonnement à **Indicateurs des services**!

Indicateurs des services (n° 63-0160XPB au catalogue) coûte 112 \$ (plus 7 % de TPS) au Canada, 135 \$ US aux États-Unis et 157 \$ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous préférez, vous pouvez télécopier votre commande en composant le 1-613-951-1584 ou téléphoner sans frais du Canada et des États-Unis au 1-800-267-6677 (ou d'ailleurs, au 1-613-951-7277) et porter les frais à votre compte VISA ou MasterCard.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services Unit,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 1-613-951-3350) or to the Statistics Canada Reference Centre in:

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

de services

Notice to Users

*Publication 62-011 Industry price indexes will undergo changes effective with the January 1996 issue. The new format will illustrate monthly data for only the current and previous year. Annual averages for the current and previous year will be shown as well. The Consulting Engineering Services Price Indexes tables 7 and 8 will be discontinued as they are currently being published in the quarterly publication **Construction Price Statistics** (62-007, \$23/\$76).*

If you need to refer to historical data, particularly from 1991-1994, we recommend that you keep one issue of the Publication 62-011 from June 1995 to December 1995 for reference. Publication 62-011 will contain data only for the current and previous year effective with the January 1996 release.

Please contact Lorne Stanton, (613-951-9602, fax: 613-951-2848) or Pierre Després (613-951-9603) for comments and information.

Avis aux utilisateurs

*Des changements seront apportés à la publication **Indices des prix de l'industrie 62-011** à partir du numéro de janvier 1996. La nouvelle présentation donnera seulement des chiffres mensuels pour l'année courante et l'année précédente. Les moyennes annuelles seront également disponibles pour l'année courante et pour l'année précédente. Les tableaux 7 et 8 pour les Indices de prix des services d'ingénierie conseil seront discontinués puisqu'ils sont disponibles dans la publication trimestrielle **Statistiques des prix de la construction** (62-007, 23 \$ / 76 \$).*

Si vous avez besoin de vous référer aux données historiques, en particulier de 1991 à 1994, nous vous recommandons de garder un numéro de la publication 62-011 de juin à décembre 1995. À partir de janvier 1996, la publication 62-011 ne contiendra que les données de l'année courante et de l'année précédente.

Veuillez communiquer avec Pierre Després au (613) 951-9603, télécopieur: 613-951-2848 ou Lorne Stanton au (613) 951-9602 pour nous faire part de vos commentaires ou pour obtenir plus d'informations.

HIGHLIGHTS

Industrial Product Price Index

November's 0.3% increase left industrial prices 5.5% higher than a year earlier. If the effect of November's fall in the value of the Canadian dollar against the United States dollar were ignored, industrial prices would have remained virtually unchanged.

Between mid-October and mid-November, the value of the Canadian dollar fell from about US 74.8 cents to US 73.8 cents, a decline of about 1.4%. This drop meant that manufacturers selling goods priced in U.S. dollars received more Canadian dollars for their products. Most affected were exporters of motor vehicles, lumber, pulp, paper, and non-ferrous metal products.

The 12-month change in industrial prices declined from +6.4% in October to +5.5% in November. It has been moving downward since January, when it peaked at +10.3%. The 12-month change in industrial prices declined noticeably for: primary non-ferrous metals; lumber, sawmill and other wood products; chemicals and chemical products; and printing and publishing.

Compared with the most recent figures for the other G-7 nations, this decline put Canada's 12-month change in producer prices in third place, below Italy (+8.7%, September) and France (+7.8%, August), but above the United Kingdom (+4.6%, October).

The most significant price increases in November came from transportation equipment (+0.8%), non-ferrous metal products (+0.9%), paper (+1.1%) and pulp (+1.2%). The increases in transportation equipment prices were principally due to higher export prices for automobiles and trucks. These mainly resulted from the decline in the value of the Canadian dollar. Domestic prices of vehicles remained virtually unchanged.

The price increases for non-ferrous metal products included copper and copper alloy products (+3.8%), nickel products (+7.4%) and refined zinc (+4.8%). Aluminum product prices edged down 1.5%, partly offsetting the increases elsewhere.

It has been suggested that speculation played a role in November's increase in copper prices. The higher price of nickel has been attributed to concern over inventory levels for 1996. Zinc's price increase occurred as strong world demand for this metal coincided with some decline in German zinc production. The gradual slowing of the world economy may have been responsible for the decline in aluminum prices. The fall in the value of the Canadian dollar contributed to nickel's price increase and reduced the effect of the decline in aluminum prices.

Compared with October, pulp prices were up 1.2% and paper prices rose 1.1%. Excluding the effect of the fall in the Canadian dollar, both rose about half a percentage point. In the case of pulp, demand pressure has eased somewhat as buyers have built up inventories and as some new capacity in Asia has come on stream. In the case of newsprint, demand has remained strong overall, but there is some doubt that projected price increases will occur.

FAITS SAILLANTS

Indice des prix des produits industriels

Une augmentation de 0,3% en novembre a porté les prix industriels à 5,5% de plus que leur niveau de l'année précédente. Sans le recul du dollar canadien face au dollar américain en novembre, les prix industriels seraient demeurés à peu près inchangés.

Entre la mi-octobre et la mi-novembre, la valeur du dollar canadien est passée d'environ 74,8 cents US à 73,8 cents US, ce qui constitue une baisse d'environ 1,4%. Les fabricants dont le prix des marchandises est exprimé en dollars US ont donc reçu plus de dollars canadiens pour leurs produits. Les plus touchés ont été les exportateurs de véhicules automobiles, de bois de construction, de pâte de bois, de papier et de produits métalliques non ferreux.

La variation sur 12 mois des prix industriels est tombée à +5,5% en novembre, contre +6,4% en octobre. Elle suit une tendance à la baisse depuis le mois de janvier, où elle avait culminé à +10,3%. La variation sur 12 mois des prix industriels a subi un net recul pour les métaux non ferreux primaires, pour les sciages, les produits de scierie et les produits divers, pour les produits chimiques et pour l'impression et l'édition.

Par rapport aux derniers chiffres disponibles pour les autres membres du Groupe des Sept, cette baisse met le Canada au troisième rang pour la variation sur 12 mois des prix à la production, après l'Italie (+8,7%, septembre) et la France (+7,8%, août), mais avant le Royaume-Uni (+4,6%, octobre).

Les augmentations de prix les plus marquées en novembre sont venues du matériel de transport (+0,8%), des produits métalliques non ferreux (+0,9%), du papier (+1,1%) et de la pâte de bois (+1,2%). Les augmentations de prix du matériel de transport ont été essentiellement le fait de la montée du prix à l'exportation des automobiles et des camions, conséquence surtout de la perte de valeur du dollar canadien. Le prix intérieur des véhicules est demeuré pour ainsi dire inchangé.

Les augmentations de prix des produits métalliques non ferreux ont touché le cuivre et les produits d'alliage de cuivre (+3,8%), les produits du nickel (+7,4%) et le zinc raffiné (+4,8%). Un fléchissement de 1,5% du prix des produits de l'aluminium a partiellement compensé les augmentations enregistrées ailleurs.

Selon certains, la spéculation a joué un rôle dans la progression du prix du cuivre en novembre. L'avance du prix du nickel est la conséquence des craintes inspirées par les niveaux de stocks pour 1996. Le zinc a subi une hausse de prix, à la faveur de la conjonction d'une vigoureuse demande mondiale et d'un certain recul de la production allemande de ce métal. Le ralentissement graduel de l'économie mondiale a peut-être été la cause de la baisse du prix de l'aluminium. La perte de valeur du dollar canadien a contribué à l'augmentation du prix du nickel et a tempéré l'effet de la diminution du prix de l'aluminium.

Par rapport à octobre, le prix de la pâte de bois a avancé de 1,2% et celui du papier, de 1,1%. Correction faite de l'effet de la chute du dollar canadien, les deux prix ont gagné environ un demi-point. Dans le cas de la pâte de bois, il y a eu un certain relâchement des pressions de la demande, les acheteurs ayant reconstitué leurs stocks et de nouveaux moyens de production ayant été mis en service en Asie. Dans le cas du papier journal, la demande demeure vigoureuse dans l'ensemble, mais il n'est pas certain que les projections d'augmentations de prix se matérialiseront.

Compared with November 1994, pulp prices were up 46.5% while paper prices rose close to 41%. Over the same period, pulp prices in the United States were up close to 49% while paper prices rose about 24%.

In November, the 12-month change in the prices of domestic consumer goods paid to manufacturers dropped to close to +3% from a little under +3.5%. It thus remained noticeably higher than the 12-month change in consumer goods prices; this dropped to +1.8% from +2.2%. Retail profits, however, were up in the third quarter compared with the second quarter. Only about half of what the consumer pays goes to manufacturers. The rest is divided among retailers, wholesalers, indirect taxes, and transporters. The retailer is thus able to cover manufacturers' price increases by a lower percentage increase in the prices charged to consumers.

Canadian industrial prices are being affected by economic weakness at home and abroad. Manufacturing shipments declined in four of the five months from June to October. Canadian exports, after surging in August, declined in both September and October. Capacity utilization in manufacturing edged down marginally in the third quarter. It was pulled down by industries hurt by weak domestic demand. November's decline in employment indicates a continuing weakness in the domestic economy.

Canada's main export market, the United States, is not showing signs of rapid growth either. In November, U.S. factory production edged up 0.2%, sufficient only to offset October's decline. Total industrial production rose only 0.2%, less than October's 0.3% decline. October's factory orders were down slightly, and inventory levels continued to increase.

Elsewhere, there are signs of economic weakness in Western Europe. In Japan, industrial production is continuing to fluctuate in the same range as in the preceding five quarters.

Par rapport à novembre 1994, le prix de la pâte de bois a progressé de 46,5%, tandis que celui du papier a augmenté de près de 41%. Sur la même période, le prix de la pâte de bois aux États-Unis a monté de près de 49% et celui du papier, d'environ 24%.

En novembre, la variation sur 12 mois du prix versé aux fabricants pour les biens de consommation intérieurs est passée d'un peu moins de +3,5% à près de +3%. Elle est donc demeurée nettement supérieure à la variation sur 12 mois des prix à la consommation des biens. Cette dernière est passée de 2,2% à 1,8%. Les profits des détaillants, toutefois, ont connu une hausse au troisième trimestre par rapport au deuxième. Les fabricants ne touchent que la moitié environ de ce que paient les consommateurs. Le reste est partagé entre les détaillants, les grossistes, les taxes indirectes et les transporteurs. Le détaillant est donc en mesure de couvrir les augmentations de prix des fabricants par un plus faible pourcentage d'augmentation des prix que les détaillants exigent des consommateurs.

Les livraisons des industries manufacturières ont diminué au cours de quatre des cinq mois de juin à octobre. Après avoir fait un bond en août, les exportations du Canada ont diminué, en septembre comme en octobre. L'utilisation de la capacité dans les industries manufacturières a légèrement baissé au troisième trimestre. Elle a été ralentie par les secteurs victimes de la faiblesse de la demande intérieure. Le recul de l'emploi en novembre traduit la faiblesse continue de l'économie nationale.

Le principal marché d'exportation du Canada, les États-Unis, ne présente pas non plus d'indices de croissance rapide. En novembre, la production des usines américaines a gagné 0,2%, soit juste assez pour compenser la baisse d'octobre. La production industrielle totale n'a avancé que de 0,2%, ce qui ne suffit pas à compenser le recul de 0,3% d'octobre. Les commandes des usines en octobre étaient légèrement plus faibles et les niveaux de stocks ont poursuivi leur progression.

Ailleurs dans le monde, on observe des indices de la faiblesse économique en Europe occidentale. Au Japon, la production industrielle continue de fluctuer dans la même fourchette qu'au cours des cinq trimestres précédents.

NOTE TO USERS

The Industrial Product Price Index (IPPI) reflects prices producers receive as goods leave their plants. It does not reflect what consumers pay. Unlike the Consumer Price Index (CPI), the IPPI excludes indirect taxes and the costs (transportation, wholesale, and retail costs) that occur from the time a good leaves a plant until the final user takes possession.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. A rise or fall in the value of the Canadian dollar against the U.S. dollar therefore affects the IPPI. A 1% change in the value of the Canadian dollar against the U.S. dollar has been estimated to change the IPPI by about 0.2%.

NOTES AUX UTILISATEURS

L'indice des prix des produits industriels (IPPI) retrace les prix que les producteurs reçoivent au moment où les produits franchissent les portes de l'usine. Il ne retrace pas ce que le consommateur paie. Contrairement à l'indice des prix à la consommation (IPC), l'IPPI exclut les impôts indirects et tous les coûts (coûts du transport et du commerce de gros et de détail) qui surviennent lorsque le produit part de l'usine jusqu'au moment où l'utilisateur final en prend possession.

Les producteurs canadiens exportent beaucoup de biens. Ils vont souvent indiquer leurs prix en devises étrangères, en particulier dans le cas des véhicules automobiles, des pâtes de bois, du papier et des produits du bois. Les fluctuations de la valeur du dollar canadien par rapport à la devise américaine se répercuteront par conséquent sur l'IPPI. Une variation de 1% de la valeur du dollar canadien par rapport au dollar américain devrait, selon les estimations, se traduire par une variation d'environ 0,2% de l'IPPI.

HIGHLIGHTS

Raw Materials Price Index

In November, manufacturers paid significantly more for their raw materials. Overall prices increased 1.8%, mainly due to crude oil, metals and vegetable products. This marked the first month of increasing prices after four successive months of declining raw material prices.

On an annual basis, raw material prices have been declining since January 1995. In November, the 12-month change was only +1.0%, compared with +18.4% in January. Commodity prices have tended to weaken overall with the economic slowdown, particularly in Western Europe and Japan.

Excluding mineral fuels, raw material prices increased 1.0% in November, and the 12-month change fell to +2.2% from +3.2% in October.

Crude oil prices were up 4.1% in November after declining almost 15% from April to October. November prices were down 2% compared with 12 months earlier. Prices strengthened in November as OPEC agreed to maintain the production status quo for at least the next six months. As well, tropical storms in the Gulf of Mexico and a rupture in the interprovincial pipeline in Manitoba caused supply problems.

Metal prices rebounded in November (+3.2%) following three months of declining prices. Higher prices for copper (+5.9%), lead (+6.6%), gold (+1.8%) and nickel (+7.2%) were the major contributors. Lower prices for aluminum materials (-2.5%) somewhat offset the higher prices. Manufacturers using copper for brass, wire and tubing have added to the upward price pressure. Also, copper prices appeared to have been subject to speculative forces as well as concerns that inventories may be too low to accommodate demand in 1996.

Prices for lead concentrates recovered almost to their January 1995 level. At that time, lead prices were at their highest in more than four years. Tight lead supplies and demand for lead-acid batteries have put upward pressure on prices.

Precious metal prices moved up in November, led by gold (+1.8%), silver (+0.8%) and platinum (+2.3%). Gold prices rose amid speculation about interest payments of U.S. government debt and reports of low gold supplies not keeping pace with demand.

Nickel concentrate prices increased 7.2%. Compared with November 1994, prices were up more than 16%. Nickel prices appeared firm, with some potential weakness coming from stainless steel producers in Southeast Asia and Germany.

Aluminum material prices weakened for a third consecutive month, falling more than 16% since August. Because of the lower prices, less idle manufacturing capacity for aluminum may come on stream in the near future. If this occurs, then further downward pressure on prices will be somewhat dampened.

FAITS SAILLANTS

Indice des prix des matières brutes

En novembre, les matières brutes ont coûté beaucoup plus cher aux fabricants. Dans l'ensemble, les prix ont augmenté de 1,8%, sous la poussée, essentiellement, du pétrole brut, des métaux et des substances végétales. Il s'agit du premier mois d'augmentation de prix après la quatrième baisse mensuelle consécutive du prix des matières brutes.

En chiffres annuels, le prix des matières brutes est en régression depuis janvier 1995. En novembre, la variation sur 12 mois n'a été que de +1,0%, comparativement à +18,4% en janvier. Le prix des produits de base a eu tendance à faiblir, dans l'ensemble, à la faveur du ralentissement économique, surtout en Europe occidentale et au Japon.

À l'exclusion des combustibles minéraux, le prix des matières brutes a avancé de 1,0% en novembre, tandis que la variation sur 12 mois se situe maintenant à +2,2%, comparativement à +3,2% en octobre.

Le prix du pétrole brut a monté de 4,1% en novembre, après un repli de près de 15% d'avril à octobre. Les prix se situaient en novembre à 2% de moins que 12 mois plus tôt. Les prix se sont raffermis en novembre lorsque l'Organisation des pays exportateurs de pétrole a convenu de maintenir le statu quo de production pour au moins six mois encore. De même, les tempêtes tropicales qui ont frappé le golfe du Mexique et la rupture au Manitoba de l'oléoduc interprovincial, ont causé des problèmes d'approvisionnement.

Le prix des métaux a rebondi en novembre (+3,2%) après 3 mois de recul. Les métaux qui ont le plus contribué à l'augmentation sont le cuivre (+5,9%), le plomb (+6,6%), l'or (+1,8%) et le nickel (+7,2%). La baisse du prix des matières d'aluminium (-2,5%) a quelque peu compensé l'augmentation de prix. Les fabricants qui utilisent du cuivre dans la production de laiton, de fils et de tubes ont contribué à l'effet d'entraînement des prix. De même, le prix du cuivre semble avoir été soumis à des forces de spéculation et avoir fait craindre que les stocks ne soient pas tout à fait suffisants pour répondre à la demande en 1996.

Le prix des concentrés de plomb s'est rétabli presque au niveau de janvier de cette année. Ce mois-là, le prix du plomb a atteint son plus haut niveau en plus de quatre ans. Le resserrement des approvisionnements en plomb et la demande d'accumulateurs au plomb ont eu un effet d'entraînement sur les prix.

Le prix des métaux précieux a avancé en novembre, sous la poussée de l'or (+1,8%), de l'argent (+0,8%) et du platine (+2,3%). Le prix de l'or a augmenté en pleine conjecture concernant les paiements d'intérêt de la dette du gouvernement américain et à la faveur de rapports indiquant que la faible offre d'or ne suivait pas la demande.

Le prix des concentrés de nickel a monté de 7,2%. Par rapport à novembre dernier, les prix étaient de 16% plus élevés. Le prix du nickel semble ferme, mais il pourrait éventuellement diminuer par l'action des producteurs d'acier inoxydable en Asie du Sud-Est et en Allemagne.

Le prix des matières d'aluminium a faibli pour le troisième mois d'affilée, chutant de plus de 16% depuis août. En raison de la baisse des prix, on pourrait voir apparaître une meilleure exploitation de la capacité de fabrication d'aluminium dans un avenir prochain. Si cela se produit, l'effet de ralentissement sur les prix sera quelque peu tempéré.

Wood prices increased almost 1% in November. Higher prices for logs (+0.9%) and pulpwood (+0.7%) contributed to the increase. Wood prices declined 3.5% over the 12 months to November. Future price changes for wood will depend on how much the lumber inventories are replenished for the 1996 construction season, as well as on the demand for pulp by papermakers.

Grain prices rose almost 4% in November. Higher prices for barley, wheat and corn were the major contributors. All these grains have increased almost or more than 40% since November 1994. The Canadian wheat harvest was forecast to increase by 1.7% to 900.2 million bushels. The return of the European Union and Australia to the export market could weaken prices. Other notable vegetable product price increases in November were rubber (+18%) and raw tobacco (+7.5%).

Hog prices, after showing significant strength over the previous few months, declined almost 13% in November. But compared with November 1994, hog prices were still up 28%. Because hogs do not winter well, farmers have brought more hogs to market, pushing prices down. Also, higher November prices for cattle (+4.1%) dampened the overall monthly price decline for animals and animal products.

Le prix du bois a progressé de près de 1% en novembre. La hausse du prix des billots (+0,9%) et du bois à pâte (+0,7%) a contribué à cette augmentation. Le prix du bois a baissé de 3,5% depuis 12 mois. Les variations futures du prix du bois dépendront de l'ampleur du regarnissement des stocks de bois de construction pour la saison de construction de 1996 et de la demande de pâte de bois chez les fabricants de papier.

Le prix des céréales a connu une hausse de près de 4% en novembre. L'orge, le blé, et le maïs ont été les principaux facteurs de l'augmentation du prix. Le prix de toutes ces céréales a avancé de près de 40% ou plus depuis novembre 1994. Les prévisions annonçaient une augmentation de 1,7% de la récolte de blé canadien, ce qui devait la porter à 900,2 millions de boisseaux. Le retour de l'Union européenne et de l'Australie sur le marché des exportations pourrait affaiblir les prix. Les autres augmentations dignes de mention du prix des substances végétales en novembre ont touché le caoutchouc (+18%) et le tabac brut (+7,5%).

Après avoir affiché une grande vigueur ces derniers mois, le prix du porc a chuté de près de 13% en novembre. Il demeure néanmoins à 28% de plus que 12 mois plus tôt. Comme les porcs supportent mal l'hiver, les agriculteurs en ont mis davantage sur le marché, ce qui a fait chuter les prix. De même, l'augmentation du prix des bovins (+4,1%) en novembre a tempéré la diminution mensuelle d'ensemble du prix des animaux et des substances animales.

NOTE TO USERS

The Raw Materials Price Index (RMPI) reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Also, unlike the Industrial Product Price Index, the RMPI includes goods that are not produced in Canada.

NOTE AUX UTILISATEURS

L'indice des prix des matières brutes est représentatif du prix que les fabricants canadiens paient pour les principales matières brutes. Un grand nombre de ces prix sont fixés sur les marchés mondiaux. De plus, contrairement à l'indice des prix des produits industriels, l'IPMB inclut des biens qui ne sont pas produits au Canada.

Mineral fuels Combustibles minéraux	104.6	100.6	107.2	4.0	-2.4	1.05	-0.66	31.7
Total excluding mineral fuels Ensemble sauf combustibles minéraux	137.1	135.7	134.1	1.0	2.2	0.80	1.62	68.3

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) This shows the amount by which the movement of each index would move the total in the absence of any change in the other indexes.

(1) Ce chiffre donne l'ampleur de la variation qu'occasionnerait dans l'indice d'ensemble un mouvement d'un indice donné si tous les autres indices demeuraient inchangés.

(2) These indexes are preliminary.

(2) Ces indices sont provisoires.

TEXT TABLE III
Raw Materials Price Indexes (1986 = 100),
Percentage Change From the Same Month a Year Earlier

TABEAU EXPLICATIF III
Indices des prix des matières brutes (1986 = 100), taux de variation
par rapport au mois correspondant de l'année précédente

	Beverages - Boissons	128.1	128.0	0.1	0.8	0.3
	Tobacco & tobacco products - Tabac & produits du tabac	172.3	172.3	0.0	0.0	4.7
	Rubber, leather, plastic fab. prod. - Prod. en caout., en cuir, mat. pla.	127.7	127.7	0.0	-0.4	2.7
	Textile products - Produits textiles	118.6	118.6	0.0	0.3	4.3
	Knitted products & clothing - Produits en tricot & vêtements	118.7	118.7	0.0	0.3	2.2
	Lumber, sawmill, other wood prod. - Sciages, prod. de scierie & divers	153.2	154.1	-0.6	-0.8	-3.8
	Furniture & fixtures - Meubles & articles d'ameublement	125.3	125.3	0.0	0.2	2.1
	Paper & paper products - Papier & produits connexes	170.9	169.4	0.9	4.0	35.2
	Printing & publishing - Impression & édition	175.7	176.6	-0.5	-0.1	17.5
	Primary metal products - Produits métalliques primaires	132.3	131.2	0.8	-2.9	1.3
	Metal fabricated products - Semi-produits métalliques	128.4	128.4	0.0	0.0	5.9
	Machinery & equipment - Machines & matériel	126.9	126.7	0.2	0.2	2.3
	Autos, trucks, other transp. eqp. - Voitures, camions & autres	121.2	120.2	0.8	1.8	3.7
	Elec. & communications prod. - Appareils élect. & de télécom.	118.0	117.8	0.2	0.3	1.7
	Non metallic mineral products - Produits minéraux non métallique	123.6	123.6	0.0	-0.2	5.4
	Petroleum & coal products - Produits du pétrole & du charbon	93.2	93.1	0.1	-0.6	-0.4
	Chemicals, chemical products - Produits chimiques	131.7	132.3	-0.5	-2.3	1.6
	Misc. manufactured products - Produits manufacturiers divers	123.4	123.2	0.2	0.2	3.1
4	Intermediate goods - Produits semi-finis	133.3	133.0	0.2	-0.1	7.2
	First-stage intermediate goods - Produits semi-finis de première étape	147.4	146.7	0.5	-1.1	10.6
	Second-stage intermediate goods - Produits semi-finis de deuxième étape	129.3	129.1	0.2	0.3	6.1
	All finished goods - Tous les produits finis	123.6	123.3	0.2	0.7	3.0
	Finished foods & feeds - Aliments de consommation et alim. pour anim.	123.8	123.8	0.0	0.0	1.9
	Capital equipment - Matériel capitalisé	126.2	125.6	0.5	1.4	3.4
	All other finished goods - Tous autres produits finis	122.1	121.8	0.2	0.8	3.3
	All manufacturing industries(2) - Industries manufacturières(2):					
3	Gross weighted (80 SIC)(2) - Pondération brute (80 CTI)(2)	129.5	129.1	0.3	0.3	5.5
6	Raw materials - Total - Ensemble des matières brutes	126.8	124.5	1.8	-2.7	1.0
	Raw materials - Total - Excl. mineral fuels - Ensemble des matières brutes, sauf combustibles minéraux	137.1	135.7	1.0	-3.6	2.2
	Vegetable products - Substances végétales	132.2	127.5	3.7	3.0	10.9
	Animals & animal products - Animaux & substances animales	110.7	111.7	-0.9	-1.8	6.3
	Wood - Bois	200.6	198.9	0.9	-8.5	-3.5
	Ferrous material - Matières ferreuses	119.6	120.9	-1.1	-3.7	-0.5
	Non-ferrous metals - Métaux non ferreux	139.7	135.4	3.2	-3.9	-0.8
	Non metallic minerals - Minéraux non métalliques	106.8	106.7	0.1	0.1	5.1
	Mineral fuels - Combustibles minéraux	104.6	100.6	4.0	-0.1	-2.4

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.

(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - Toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations
TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations de produits

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus r  cents sont sujets    r  vision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agr  gation des indices par produits ou par industries devraient r  sult  r en un m  me grand total. Lorsque ces totaux diff  rent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra   tre consid  r   comme celui qui fait autorit  , et l'indice total - toutes les industries manufacturi  res sera pos     gal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code num  rique    la droite du num  ro Databank de CANSIM apparaissant    la ligne du bas de chaque s  rie est le code de la Classification type des industries (CTI) de 1980. Une explication des donn  es en pourcentage (mesure de degr   de couverture) apparaissant    la droite du code CTI est disponible    la fin du tableau 2. Ces mesures de degr   de couverture sont arrondies au 5% le plus pr  s afin de pr  server la confidentialit  .

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

(1) Monthly prices are collected and processed three times per annum.

(1) Des prix mensuels sont relevés et calculés trois fois par année.

(2) Indexes for the current year and previous year are subject to revision.

(2) Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

TABLE 6. Raw Materials Price Indexes
TABLEAU 6. Indices des prix des matières brutes

1986 = 100

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum_i w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

\sum_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w_i}{\sum w_i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w_i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w_i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

\sum_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios), and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en œuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprennent les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'œuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialties. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec l'Unité de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

Pick a topic... any topic

The **1994 Statistics Canada Catalogue** is your guide to the most complete collection of facts and figures on Canada's changing business, social and economic environment. No matter what you need to know, the **Catalogue** will point you in the right direction.

From the most popular topics of the day - like employment, income, trade, and education - to specific research studies - like mineral products shipped from Canadian ports and criminal victimization in urban areas - you'll find it all here.

... the 1994 Statistics Canada Catalogue will help you get your bearings...

The **Catalogue** puts all this information at your fingertips. With the expanded index, you can search by subject, author or title - even periodical articles are indexed. There's also a separate index for all our electronic products.

The **Catalogue** has everything you need to access all Statistics Canada's products:

- descriptions of over 25 new titles, plus succinct abstracts of the over 650 titles and 7 map series already produced;
- a complete guide to finding and using statistics;
- electronic products in a variety of media, and

advice on getting expert assistance on electronic products and on-line searches;

- tabs to each section - so you can immediately flip to the information you need.

... time and time again

To make sure that the **Catalogue** stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today - you'll be lost without it.

Choisissez un sujet... n'importe lequel

Le **Catalogue de Statistique Canada 1994** est votre guide pour la collection la plus complète de faits et de chiffres dans les domaines, en constante évolution, du commerce, de la société et de l'économie du Canada. Peu importe ce que vous voulez savoir, le **Catalogue** vous mettra sur la bonne piste.

Des sujets actuels les plus populaires - comme l'emploi, le revenu, le commerce et l'éducation - à des études de recherche spécialisées - comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines - vous trouverez tout dans ce document.

Le Catalogue de Statistique Canada 1994 vous aidera à vous orienter...

Le **Catalogue** vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre - les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le **Catalogue** a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

- descriptions de plus de 25 nouveaux titres et courts résumés des 650 titres et plus et des 7 séries de cartes déjà disponibles;
- guide complet pour obtenir et utiliser les données statistiques;
- produits électroniques sur supports divers et conseils sur l'obtention d'aide d'experts pour

les produits électroniques et les recherches en direct;

- système d'onglets pour chaque section - pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

...maintes et maintes fois

Pour garantir que le **Catalogue** puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui - vous ne pourrez plus vous en passer.

Canada

Don't let the changing world
take you by surprise!

Ne soyez pas dépassé
par les événements!

An aging population. Lone-parent families. A diverse labour force. Do you know how today's social changes will affect your future ... your organization ... and your family?

Keep pace with the dramatic shifts in Canada's evolving social fabric with Statistic Canada's best-selling quarterly, *Canadian Social Trends*. With vast and varied reports on major changes in key social issues and trends, this periodical incorporates findings from over 50 national surveys.

Written by some of Canada's leading-edge social analysts, *Canadian Social Trends* combines painstaking research with dynamic prose on topics like ethnic diversity, low-income families, time-crunch stress, violent crime and much more — all in a colourful, easy-to-read, magazine format.

A lasting record of changing times!

Join the thousands of business and policy analysts, social-science professionals, and academics who trust *Canadian Social Trends* to demystify the causes and consequences of change in Canadian society. Don't miss a single issue — subscribe today.

Canadian Social Trends (catalogue number 11-0080XPE) is \$34 (plus GST and applicable PST) annually in Canada, US\$41 in the United States and US\$48 in other countries.

Le vieillissement de la population. Les familles monoparentales. La diversification de la population active. Savez-vous comment les changements sociaux d'aujourd'hui vont se répercuter sur votre avenir, votre organisation, votre famille?

Suivez l'évolution spectaculaire de la société canadienne grâce à *Tendances sociales canadiennes*, une publication trimestrielle de Statistique Canada. Avec des articles vastes et variés sur les principaux changements caractérisant les questions et les tendances sociales principales, cette publication intègre les résultats de plus de 50 enquêtes nationales.

Certains des analystes sociaux les plus reconnus du Canada rédigent des articles dans *Tendances sociales canadiennes*. Ils présentent les résultats de recherches minutieuses dans un style attrayant pour des sujets tels que la diversité ethnique, les familles à faible revenu, le stress dû au manque de temps, le crime et bien d'autres encore dans une revue haute en couleur et de lecture aisée.

Un dossier permanent d'une époque en évolution!

Des milliers d'analystes des entreprises et des politiques, de professionnels des sciences sociales et d'universitaires lisent *Tendances sociales canadiennes* pour identifier les causes et les conséquences de l'évolution de la société canadienne. Ne manquez pas un numéro, abonnez-vous dès aujourd'hui.

L'abonnement annuel à *Tendances sociales canadiennes* (n° 11-0080XPF au catalogue) coûte 34 \$ (plus la TPS et la TVP en vigueur) au Canada, 41 \$ US aux États-Unis et 48 \$ US dans les autres pays.

Women in Canada

Two Decades of Change

Recent decades have witnessed dramatic changes in the roles women play in Canadian society. There have been considerable improvements in the social and economic situation of women in the last two decades, however, gaps continue to exist between many leading socio-economic indicators for women and men. No other publication chronicles the changing status of women more clearly than **Women in Canada**!

This 180-page portrait examines a wide range of topics in women's lives including:

- housing
- income
- family status
- health
- education
- criminal victimization
- labour force characteristics

In addition, the report presents separate sections on:

- immigrant women
- women in visible minorities
- Aboriginal women
- women with disabilities

More than just facts!

Women in Canada offers the most in-depth, accurate information available on women today. With its easy-to-read format, and over 200 charts and tables, you'll discover many essential facts about the changing status of women over the last two decades.

Being aware of the roles, status and lifestyles of Canadian women is essential for **planning and implementing appropriate social policies**, for **developing successful marketing strategies**, or for simply **gaining a better appreciation** of how Canadian society has changed.

Women in Canada (89-5030XPE, issue # 95001) is available in Canada for \$49 (plus PST & GST), US \$59 in the United States, and US \$69 in other countries.

To order, write to

Statistics Canada, Operations and Integration Division,
Circulation Management, Ottawa, Ontario K1A 0T6

or contact the nearest Statistics Canada Regional Office listed in this publication.

For faster service, fax your order to **1-613-951-1584** or call toll free **1-800-267-6677** and use your VISA or MasterCard.

Femmes au Canada

Deux décennies de changements profonds

Au cours des décennies récentes, les rôles que jouent les femmes dans la société ont subi des bouleversements profonds. La situation sociale et économique des femmes s'est améliorée

considérablement pendant les deux dernières décennies; cependant, il existe toujours un fossé entre les nombreux indicateurs sociaux et économiques qui s'appliquent aux hommes et aux femmes. Aucune autre publication ne retrace l'évolution des femmes aussi soigneusement que **Les femmes au Canada**.

Ce tout dernier rapport de 180 pages traite des divers aspects de la vie des femmes, notamment :

- les caractéristiques de la population active
- le revenu
- la famille
- la santé
- le logement
- l'éducation
- la victimisation

De plus, ce rapport comporte des sections distinctes:

- sur les immigrantes
- les membres de minorités visibles
- les femmes autochtones
- les femmes ayant une incapacité.

Les faits... et encore plus!

Les femmes au Canada vous fournit l'information la plus détaillée et la plus exacte qui soit sur les femmes d'aujourd'hui. Ouvrage de lecture facile, il contient plus de 200 tableaux et graphiques sur les points clés de l'évolution des femmes au cours des deux dernières décennies.

Connaître les rôles, les situations et les modes de vie des femmes canadiennes constitue un élément essentiel pour ce qui est de la planification et la mise en oeuvre des politiques sociales opportunes, l'élaboration des stratégies efficaces de marketing, et la compréhension des transformations qui ont marqué la société canadienne.

Les femmes au Canada (numéro au catalogue 89-5030XPF, numéro de l'édition 95001) est disponible au coût de 49 \$ (TPS et TVP en sus) au Canada, 59 \$ US aux États-Unis et 69 \$ US dans les autres pays.

Pour commander, veuillez écrire à

Statistique Canada, Division des opérations et intégration, Direction de la circulation, Ottawa (Ontario), K1A 0T6

ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

Pour un service plus rapide, commandez par télécopieur au **1-613-951-1584** ou composez sans frais le **1-800-267-6677** et utilisez votre carte VISA ou MasterCard.

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada.

Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" - "Permanence of Paper for Printed Library Materials", ANSI Z39.48 - 1984.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division

Producing Industries Section

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et
de services

Notice to Users

*Publication 62-011 Industry price indexes will undergo changes effective with the January 1996 issue. The new format will illustrate monthly data for only the current and previous year. Annual averages for the current and previous year will be shown as well. The Consulting Engineering Services Price Indexes tables 7 and 8 will be discontinued as they are currently being published in the quarterly publication **Construction Price Statistics** (62-007, \$23/\$76).*

If you need to refer to historical data, particularly from 1991-1994, we recommend that you keep one issue of the Publication 62-011 from June 1995 to December 1995 for reference. Publication 62-011 will contain data only for the current and previous year effective with the January 1996 release.

Please contact Lorne Stanton, (613-951-9602, fax: 613-951-2848) or Pierre Després (613-951-9603) for comments and information.

Avis aux utilisateurs

*Des changements seront apportés à la publication **Indices des prix de l'industrie 62-011** à partir du numéro de janvier 1996. La nouvelle présentation donnera seulement des chiffres mensuels pour l'année courante et l'année précédente. Les moyennes annuelles seront également disponibles pour l'année courante et pour l'année précédente. Les tableaux 7 et 8 pour les Indices de prix des services d'ingénierie conseil seront discontinués puisqu'ils sont disponibles dans la publication trimestrielle **Statistiques des prix de la construction** (62-007, 23 \$ / 76 \$).*

Si vous avez besoin de vous référer aux données historiques, en particulier de 1991 à 1994, nous vous recommandons de garder un numéro de la publication 62-011 de juin à décembre 1995. À partir de janvier 1996, la publication 62-011 ne contiendra que les données de l'année courante et de l'année précédente.

Veuillez communiquer avec Pierre Després au (613) 951-9603, télécopieur: 613-951-2848 ou Lorne Stanton au (613) 951-9602 pour nous faire part de vos commentaires ou pour obtenir plus d'informations.

HIGHLIGHTS

Industrial Product Price Index

Driven mainly by export-oriented inputs, 1995's annual average increase in industrial prices was 8.1%, its largest jump since 1981. Industrial prices slowed in the first half of 1995, and then stagnated in the second half.

Of the main product categories, paper and paper products saw the steepest annual average price increase (+38%). This stimulated a 21% increase in printing and publishing prices.

Prices rose in every major commodity group except wood products. A very low level of residential construction particularly hurt softwood lumber prices.

Because many export prices are quoted in U.S. dollars, changes in the Canadian-U.S. exchange rate in 1995 significantly influenced the month-to-month fluctuations in industrial prices. The fluctuations amplified the change in the price index in some months and dampened it in others. During the year, this rate fluctuated between US\$1 = C\$1.337 and US\$1 = C\$1.416.

In 1995, the largest annual average price increase in a major industrial sector was 38% for paper and paper products. Pulp and paper plants around the world operated at close to full capacity in an attempt to meet the demand. As a result, pulp's annual average price increase was 61%; newsprint's increase was 43%.

Many North American newspapers responded by changing format to reduce consumption; publishers moved to thinner paper and/or narrower pages. In the printing and publishing sector, the annual average price increase was 21%, a consequence of the price increase for paper.

Primary metal products (+15%) ranked third in annual average price increases, mainly due to non-ferrous metal products (+21%). In addition, much of an 8% annual average increase in iron and steel product prices was caused by a rise in cost of the non-ferrous metals used in making steel alloys, particularly nickel.

The principal non-ferrous metal products posted substantial annual average price increases: aluminum products (+24%), copper and copper alloy products (+24%), and nickel products (+34%). After increasing steadily in 1994, prices for these products peaked in early 1995. Then, as economic conditions weakened, prices fluctuated or tended to move downward. Consequently, in December, aluminum product prices were down 9% from December 1994. Copper and copper alloy product prices were down 3%. Nickel product prices were virtually unchanged.

In December, the 12-month change in industrial prices continued its decline from the January 1995 peak of +10.3%. It fell to +5.2% in December as prices rose +0.5% from November. However, if the effect of exchange rate movements on prices quoted in U.S. dollars were ignored,

FAITS SAILLANTS

Indice des prix des produits industriels

Sous la poussée, essentiellement, des biens d'intrant destinés à l'exportation, l'augmentation moyenne annuelle des prix industriels en 1995 a été de 8,1%, soit le bond le plus considérable depuis 1981. Les prix industriels ont connu un ralentissement dans la première moitié de 1995 et ont ensuite stagné dans la deuxième moitié.

Parmi les principales catégories de produits, ce sont le papier et les produits connexes qui ont connu l'augmentation de prix moyenne annuelle la plus prononcée, soit 38%. Cette hausse a stimulé la progression de 21% du prix de l'impression et de l'édition.

Les prix ont avancé dans presque toutes les principales catégories de groupes de marchandises, sauf dans les produits du bois. Un niveau très bas de construction résidentielle a porté un très dur coup au prix du bois résineux de construction.

Parce que de nombreux prix à l'exportation sont cités en dollars US, les variations du taux de change entre le Canada et les États-Unis en 1995 ont eu une grande influence sur les fluctuations d'un mois à l'autre des prix industriels. Ainsi qu'il est illustré, les variations du taux de change ont amplifié le changement de l'indice de prix pour certains mois et l'ont tempéré pour d'autres. Pendant l'année, ce taux de change a fluctué entre 1\$US = 1 416\$CAN et 1\$US = 1 337\$CAN.

En 1995, la plus forte augmentation de prix moyenne annuelle dans un grand secteur industriel a été de 38% pour le papier et les produits connexes. Les usines de pâtes et papiers dans le monde ont opéré à pleine capacité ou presque pour tâcher de répondre à la demande. Par conséquent, l'augmentation de prix moyenne annuelle des pâtes a été de 61%. Celle du papier journal a été de 43%.

Les journaux nord-américains ont souvent réagi en réduisant leur consommation de papier par un changement de présentation. Souvent les éditeurs ont opté pour du papier plus mince ou ont rétréci leurs pages. Dans le secteur de l'impression et de l'édition, l'augmentation de prix moyenne annuelle a été de 21%, sous l'effet de l'avance du prix du papier.

Les produits métalliques primaires (+15%) se sont classés au troisième rang pour les augmentations de prix moyennes annuelles, à cause surtout des produits métalliques non ferreux (+21%). En outre, une bonne part de l'augmentation moyenne annuelle de 8% du prix des produits du fer et de l'acier est le fait de la progression du coût des métaux non ferreux utilisés dans la fabrication des alliages d'acier, et particulièrement du nickel.

Il y a eu des augmentations de prix moyennes annuelles considérables pour les principaux produits métalliques non ferreux: les produits de l'aluminium (+24%), le cuivre et les alliages de cuivre (+24%) et les produits du nickel (+34%). Après une progression ininterrompue en 1994, le prix de ces produits a culminé au début de 1995. Puis, avec l'affaiblissement de la conjoncture, ils ont fluctué ou ont eu tendance à baisser. Par conséquent, en décembre 1995, le prix des produits de l'aluminium était de 9% plus bas qu'un an plus tôt. Le prix des produits du cuivre et des alliages de cuivre avait diminué de 3%. Le prix des produits du nickel demeurait à peu près inchangé.

En décembre, la variation sur 12 mois des prix industriels a poursuivi son repli par rapport à son sommet de 10,3% du mois de janvier. La variation sur 12 mois est tombée à +5,2%, les prix ayant progressé de +0,5% par rapport à leur niveau de novembre. Correction faite, toutefois, de l'effet des mouvements du taux de change sur les prix cités en

the month-to-month change in industrial prices would have been +0.2%.

The exchange rate accounted for most of the increase in motor vehicle prices. Price increases for gasoline, fuel oil, ethylene, and feeds accounted for most of the remainder. The most noteworthy decline was in pulp prices, down 3.4%. This was their first decline since November 1993.

In late 1995, economic conditions remained relatively unfavourable for price increases. Internationally, there were few signs of strong growth in North America, Japan or Europe. Canadian domestic demand for industrial products also showed signs of weakness. The available figures for Canadian manufacturing indicate that, in the first 11 months of 1995, inventories continued to increase. However, new orders declined in 7 of the 10 months from February to November. Unfilled orders were down in 6 of the 7 months from May to November. Employment in manufacturing declined in October, November and December.

Discouraged by relatively weak Christmas retail sales, retailers appeared to be absorbing some price increases on consumer goods. In December, the gap between the 12-month price change by manufacturers and the 12-month change to consumers increased to 2 percentage points from 1.5 percentage points. At the manufacturers' level, December's 12-month price increase for domestic consumer goods rose to just under 4%. The 12-month change in the goods' component of the CPI was a little less than half that. It edged down to +1.7%. Usually, about half of the consumer dollar goes to manufacturers, the rest goes to wholesalers, retailers, transporters and governments.

dollars US, la variation d'un mois à l'autre des prix industriels aurait été de +0,2%.

Les effets du taux de change expliquent en grande partie l'augmentation du prix des véhicules automobiles. Les augmentations du prix de l'essence, du mazout, de l'éthylène et des aliments pour animaux expliquent l'essentiel du reste. Le recul le plus marquant a touché le prix des pâtes de bois, qui a reculé de 3,4%. C'est sa première diminution depuis novembre 1993.

À la fin de 1995, la conjoncture est demeurée relativement défavorable pour les augmentations de prix. À l'échelle internationale, il y avait peu d'indices de vigoureuse croissance en Amérique du Nord, au Japon et en Europe. La demande intérieure canadienne des produits industriels accusait également des signes de faiblesse. Selon les chiffres disponibles pour les industries manufacturières canadiennes, pendant les 11 premiers mois de 1995, les stocks ont continué de croître. Cependant, le volume des nouvelles commandes a diminué dans sept des dix mois (de février à novembre). Les camets de commandes ont diminué dans six des sept mois (de mai à novembre). L'emploi dans les industries manufacturières a reculé en octobre, en novembre et en décembre.

Découragés par la faiblesse relative des ventes au détail de Noël, les détaillants ont absorbé une partie des augmentations de prix des biens à la consommation. En décembre, l'écart entre la variation de prix sur 12 mois pour les manufacturiers et la variation de prix sur 12 mois pour les consommateurs a augmenté de 1,5 points de pourcentage à 2 points de pourcentage. Au niveau des fabricants, l'augmentation sur 12 mois observée en décembre pour les biens de consommation intérieurs est passée à un peu moins de 4%. La variation sur 12 mois de la composante des biens de l'Indice des prix à la consommation a été d'un peu moins que la moitié de cette progression. Elle s'est repliée à +1,7%. Habituellement, environ la moitié du dollar du consommateur va aux fabricants et le reste aux grossistes, aux détaillants, aux transporteurs et aux administrations publiques.

NOTE TO USERS

The industrial product price index (IPPI) reflects the prices producers receive as goods leave their plants. It does not reflect what consumers pay. Unlike the consumer price index, the IPPI excludes indirect taxes and all costs (including the transportation, wholesale, and retail costs) occurring from the time a good leaves a plant until a final user takes possession.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. A rise or fall in the value of the Canadian dollar against the U.S. dollar therefore affects the IPPI. A 1% change in the value of the Canadian dollar against the U.S. dollar has been estimated to change the IPPI by about 0.2%.

NOTE AUX UTILISATEURS

L'indice des prix des produits industriels (IPPI) reflète les prix que les producteurs reçoivent au moment où les produits franchissent les portes de l'usine. Il ne reflète pas ce que les consommateurs paient. Contrairement à l'indice des prix à la consommation, l'IPPI exclut les impôts indirects et tous les coûts qui surviennent entre le moment où un produit sort de l'usine et le moment où l'utilisateur final en prend possession, ce qui comprend les coûts du transport, du commerce de gros et du commerce de détail.

Les producteurs canadiens exportent beaucoup de biens. Ils vont souvent donner leurs prix en devises étrangères, en particulier dans le cas des véhicules automobiles, de la pâte de bois, du papier et des produits du bois. Les fluctuations du dollar canadien par rapport à la devise américaine se répercuteront par conséquent sur l'IPPI. Une variation de 1% de la valeur du dollar canadien par rapport au dollar US, selon les estimations, se traduit par une variation d'environ 0,2% de l'IPPI.

HIGHLIGHTS

Raw Materials Price Index

Manufacturers paid 8.5% more for raw materials in 1995 than in 1994. It was the third year in a row where the annual average increased substantially. Most of the increase came from higher prices for metals, crude oil, vegetable products and wood.

Prices for raw materials have increased substantially over the past three years. The increase in 1995 followed a 7.7% rise in 1994 and 5.9% advance in 1993. Non-ferrous metals (+20%) led the increases in 1995, followed by crude oil (+10%), vegetable products (+10%) and wood (+9%).

On a monthly basis, manufacturers paid 1.8% more for raw materials in December than in November. Prices were 2.2% higher than in December 1994. Higher monthly prices in December for crude oil (+4.6%) and grains (+3.1%) were somewhat offset by lower raw tobacco (-4.6%) and cattle (-1.9%) prices.

Non-ferrous metal prices increased almost 20% in 1995. The major contributors were copper (+26%), nickel (+34%), aluminum materials (+21%) and lead (+16%). Prices for most of these metals, except lead, decreased in the last six months of 1995.

Base metal prices weakened again in December as industrial activity slowed in the G7 nations. As well, inventories of stainless steel have been reduced in Europe and the Far East.

Metal prices in 1996 will depend on the performances of the domestic and export sectors. The auto and construction sectors are major metal users. Canadian auto production set a record for a fourth straight year in 1995, and there is optimism for a fifth record in 1996. Canada's car production outweighs its consumption of domestically produced autos, leaving a surplus for export to the United States.

The construction sector has not yet given strong enough signals for 1996 to bring about a resurgence of demand for metals. The Organisation for Economic Co-operation and Development (OECD) forecast real GDP growth rates for the G7 in 1996 at between 2% and 3%, with Canada leading the way.

Crude oil prices rose almost 10% on an annual basis in 1995. Prices strengthened in the first six months of the year, and then weakened, regaining strength in November and December. Recent OPEC talks, which confirmed status-quo production quotas, along with unusually cold weather in November and December in the United States and Europe tended to firm up oil prices. Low inventory levels added to the upward pressure. Canada exported more crude oil to the United States in 1995, thanks to additional pipeline capacity.

Vegetable product prices increased more than 10% annually in 1995. Higher prices for grains (+17%), rubber (+37%) and raw tobacco (+14%) were marginally offset by lower prices for potatoes and oilseeds.

FAITS SAILLANTS

Indice des prix des matières brutes

En 1995, les fabricants ont payé leurs matières brutes 8,5% plus cher; c'est la troisième forte augmentation moyenne annuelle d'affilée. L'augmentation est venue essentiellement de la hausse du prix des métaux, du pétrole brut, des substances végétales et du bois.

Le prix des matières brutes a augmenté considérablement au cours des trois dernières années. Le gain de 1995 venait après une hausse de 7,7% en 1994 et une majoration de 5,9% en 1993. Les métaux non ferreux (+20%) ont été le principal facteur des augmentations de prix en 1995, étant suivis en cela par le pétrole brut (+10%), les substances végétales (+10%) et le bois (+9%).

En chiffres mensuels, les fabricants ont payé leurs matières brutes 1,8% plus cher en décembre qu'en novembre. Les prix de décembre étaient de 2,2% supérieurs à ceux de décembre 1994. La montée des prix mensuels en décembre pour le pétrole brut (+4,6%) et les céréales (+3,1%) a été dans une certaine mesure annulée par la baisse du prix du tabac brut (-4,6%) et des bovins (-1,9%).

Le prix des métaux non ferreux a progressé de près de 20% en 1995. Les principaux facteurs de l'augmentation des prix ont été le cuivre (+26%), le nickel (+34%), les matières d'aluminium (+21%), et le plomb (+16%). Le prix de la plupart de ces métaux, sauf le plomb, a fléchi au cours des six derniers mois de 1995.

Le prix des métaux communs a glissé de nouveau en décembre, avec un ralentissement de l'activité industrialisée du Groupe des Sept. De même, il y a eu une réduction des stocks d'acier inoxydable en Europe et en Extrême-Orient.

Le prix des métaux en 1996 sera fonction des performances des activités intérieures et de celles de l'exportation. Les secteurs de l'automobile et de la construction sont de grands utilisateurs de métaux. La production automobile canadienne a atteint un niveau record pour la quatrième année de suite en 1995, et on est optimiste pour une cinquième année record en 1996. La production de voitures canadiennes dépasse la consommation d'automobiles de production canadienne, ce qui laisse un surplus à exporter vers les États-Unis.

Le secteur de la construction n'a pas encore affiché de signaux assez vigoureux pour annoncer une reprise de la demande de métaux en 1996. Au niveau international, l'Organisation de coopération et de développement économiques a prévu des taux de croissance de 2% à 3% du PIB réel pour les pays du Groupe des Sept, et le Canada vient en tête de liste.

Le prix du pétrole brut a augmenté annuellement en 1995 de près de 10%. Il s'est raffermi dans les six premiers mois de 1995, puis s'est affaibli et a repris de la vigueur en novembre et en décembre. Les récents pourparlers de l'Organisation des pays exportateurs de pétrole confirmant le maintien des contingents de production, conjugués à un temps exceptionnellement froid en novembre et en décembre aux États-Unis et en Europe, ont eu tendance à raffermir les prix. La faiblesse des niveaux de stocks a accentué l'effet d'entraînement sur les prix. Le Canada a exporté plus de pétrole brut aux États-Unis grâce à une nouvelle capacité d'oléoduc.

Le prix des substances végétales a avancé à un taux annuel supérieur à 10% en 1995. La hausse du prix des céréales (+17%), du caoutchouc (+37%) et du tabac brut (+14%) a été légèrement compensée par une baisse du prix des pommes de terre et des graines oléagineuses.

Grain prices were led by higher prices for wheat (+18%), barley (+32%) and corn (+6%). Wheat prices hit a 15-year high, with world supplies at their lowest levels in almost 20 years. Nearly all the world's wheat-growing countries were faced with poor weather during the growing season.

Higher Canadian wheat prices, which rose almost \$40 per ton in 1995, helped farmers defray new grain transportation costs after the federal government ended subsidized rail movement of grains to ports. Wheat sales to China, Canada's largest single foreign buyer, rose 35% compared with 1994.

Hog prices rose almost 5% annually compared with 1994. Prices in December were up 34% from December 1994. Cattle prices declined more than 6% annually in 1995. A surplus of hogs and cattle, accompanied by high feed costs (+17% from December 1994 to December 1995), could further dampen price increases.

Wood prices increased 9% from 1994 to 1995, a fifth straight annual average increase. Wood prices have increased almost 80% since 1990.

In 1995, wood prices weakened in the last half of the year, a result of significantly lower log prices and stagnating pulpwood prices. Pulpwood demand should pick up in 1996 because of orders for printing and writing paper from Europe and increased U.S. demand for paper due to the upcoming Olympic Games and the U.S. Presidential election.

Log prices may be subject to a price change if there is further study concerning Canadian stumpage fees and exports of lumber to the United States. Canadian sales of softwood lumber (mainly from Quebec and Ontario) to the United States rose in 1995.

Le prix des céréales a monté sous la poussée de l'augmentation du prix du blé (+18%), de l'orge (+32%) et du maïs (+6%). Le prix du blé a atteint un sommet en 15 ans, au moment où les approvisionnements mondiaux étaient à leur plus bas en près de 20 ans. La quasi-totalité des pays producteurs de blé dans le monde ont été affligés par le mauvais temps pendant la saison de croissance.

La croissance du prix du blé canadien, qui a monté de près de 40\$ la tonne en 1995, a aidé les agriculteurs à acquitter les nouveaux frais de transport des céréales, au moment où le gouvernement fédéral a mis fin à ses subventions au transport ferroviaire des céréales vers les ports. Les ventes de blé à la Chine, premier client étranger du Canada, ont monté de 35% par rapport à 1994.

Le prix du porc a connu une progression annuelle de près de 5% par rapport à 1994. En décembre 1995, il était de 34% plus haut qu'en décembre de l'année précédente. Le prix des bovins a subi un recul annuel de plus de 6% en 1995. Un surplus de porcs et de bovins, accompagné d'un niveau élevé du prix des aliments pour animaux, qui a monté de +17% entre décembre 1994 et décembre 1995, pourrait tempérer les autres augmentations de prix.

Le prix du bois a avancé de 9% par rapport à 1994, ce qui constitue une cinquième augmentation moyenne annuelle consécutive. Il a progressé de près de 80% depuis 1990.

En 1995, le prix du bois a faibli dans les six derniers mois de l'année, conséquence d'une diminution considérable du prix des billes et de la stagnation du prix du bois à pâte. Il devrait y avoir une reprise de la demande de bois à pâte en 1996, sous l'effet des commandes européennes de papier à imprimer et à écrire, et d'un accroissement de la demande de papier aux États-Unis à la faveur des Jeux olympiques d'été et des élections présidentielles.

Le prix des billes pourrait être sujet à variation, selon qu'il y aura ou non une nouvelle étude sur les droits de coupe canadiens et les exportations de bois de construction vers les États-Unis. Les ventes canadiennes de bois résineux de construction aux États-Unis ont augmenté en 1995, surtout dans le cas des produits provenant du Québec et de l'Ontario.

NOTE TO USERS

The Raw Materials Price Index (RMPI) reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Also, unlike the Industrial Product Price Index, the RMPI includes goods that are not produced in Canada.

NOTE AUX UTILISATEURS

L'indice des prix des matières brutes est représentatif du prix que les fabricants canadiens paient pour les principales matières brutes. Un grand nombre de ces prix sont fixés sur les marchés mondiaux. De plus, contrairement à l'indice des prix des produits industriels, l'IPMB inclut des biens qui ne sont pas produits au Canada.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.

(2) Ces indices sont provisoires.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - Toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.

pppp indicates the PGC code (except for some special aggregations which include several PGCs).

rr indicates a split of a PGC.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

ss indique le code du niveau S des produits (de 9 à 28)

mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)

nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.

pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

- (1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
- (1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.
- (2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.
- (2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

Note: Indexes for 1989-93 have been revised and 1994 indexes are preliminary.
 Nota: Les indices de 1989-93 ont été révisés et les indices de 1994 sont provisoires.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

\sum_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

- 62-558 Industry Price Indexes, 1986 = 100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

- 62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

- 62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

- 62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitué recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w_i}{\sum w_i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w_i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w_i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

\sum_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios), and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprennent les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec l'Unité de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

Pick a topic... any topic

The **1994 Statistics Canada Catalogue** is your guide to the most complete collection of facts and figures on Canada's changing business, social and economic environment. No matter what you need to know, the **Catalogue** will point you in the right direction.

From the most popular topics of the day – like employment, income, trade, and education – to specific research studies – like mineral products shipped from Canadian ports and criminal victimization in urban areas – you'll find it all here.

... the 1994 Statistics Canada Catalogue will help you get your bearings...

The **Catalogue** puts all this information at your fingertips. With the expanded index, you can search by subject, author or title – even periodical articles are indexed. There's also a separate index for all our electronic products.

The **Catalogue** has everything you need to access all Statistics Canada's products:

- descriptions of over 25 new titles, plus succinct abstracts of the over 650 titles and 7 map series already produced;
- a complete guide to finding and using statistics;
- electronic products in a variety of media, and

advice on getting expert assistance on electronic products and on-line searches;

- tabs to each section -- so you can immediately flip to the information you need.

... time and time again

To make sure that the **Catalogue** stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today – you'll be lost without it.

Choisissez un sujet... n'importe lequel

Le **Catalogue de Statistique Canada 1994** est votre guide pour la collection la plus complète de faits et de chiffres dans les domaines, en constante évolution, du commerce, de la société et de l'économie du Canada. Peu importe ce que vous voulez savoir, le **Catalogue** vous mettra sur la bonne piste.

Des sujets actuels les plus populaires – comme l'emploi, le revenu, le commerce et l'éducation – à des études de recherche spécialisées – comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines – vous trouverez tout dans ce document.

Le Catalogue de Statistique Canada 1994 vous aidera à vous orienter...

Le **Catalogue** vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre – les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le **Catalogue** a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

- descriptions de plus de 25 nouveaux titres et courts résumés des 650 titres et plus et des 7 séries de cartes déjà disponibles;
- guide complet pour obtenir et utiliser les données statistiques;
- produits électroniques sur supports divers et conseils sur l'obtention d'aide d'experts pour

les produits électroniques et les recherches en direct;

- système d'onglets pour chaque section – pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

... maintes et maintes fois

Pour garantir que le **Catalogue** puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui – vous ne pourrez plus vous en passer.

Canada

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistic Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts – names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue no. 10-2300XPB) is \$220 (plus GST and applicable PST) annually in Canada, US\$260 in the United States and US\$310 in other countries.

Highlights of the *Canadian Composite Leading Indicator* (catalogue no. 11F0008XFE) are available by fax – the same day of release – for \$70 annually in Canada and US\$70 in the United States.

To order, write to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard. Via Internet: order@statcan.ca

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique** annuel à titre gracieux.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-2300XPB au catalogue) est de 220 \$ (plus la TPS et la TVP en vigueur) au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays. Les faits saillants de l'*Indicateur composite avancé* (n° 11F0008XFE au catalogue) sont offerts par télécopieur – le jour même de leur parution – pour 70 \$ par année au Canada et 70 \$ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division des Opérations et de l'intégration, Direction de la circulation, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.
